# FARRIER CATALOGUE

2016 - 2017

We've been farriers and have a solid understanding of most of the products we stock. If you need help or advice about a product then please ask.

If there's something you need that is not listed in this catalogue then there's a chance we might have it anyway or can source it for you. We import and distribute farrier and hoofcare products from all over the world.

## WAREHOUSE

The physical store is open 9am to 5pm Monday to Friday excluding holidays for visitors (out of hours visits by prior arrangement). We are contactable via text, phone, or web, any time.

We are located at:

**115 West Coast Road, Yaldhurst, Christchurch 7676, New Zealand**

Christchurch 7676, New Zealand

## MAILING ADDRESS

---

P3 Equestrian Limited, PO Box 4558,  
Christchurch 8140, New Zealand

## SHIPPING

---

We specialise in mail order.

Target delivery for North or South Island orders is the next working day (2 days for bulky items and some rural addresses) for in-stock items.

Saturday deliveries are sometimes available for an extra charge depending on location.

We ship daily to the North and South Islands and to Australia. We regularly ship to other international locations.

## PAYMENT

---

We accept payment by direct credit, Visa, MasterCard, AMEX, PayPal, cash and EFTPOS.

# SPECIALIST SHOES

## Jim Blurton remedial shoes

Remedial shoes to help correct and alleviate foot problems in horses.

A unique feature of these shoes is the pitched nail holes, providing a different angle for each nail and making it easier to nail on.

These shoes incorporate a rolled toe and are safed off at the heel.

Side clips are standard and they have a countersunk position for stud holes.

Size (front)	Width (inches)
3x0	4 ½
2x0	4 ¾
0	5
1	5 ¼
2	5 ½
3	5 ¾
4	6
5	6 ¼

### Jim Blurton graduated bar

Three degree wedge bar shoes designed to assist in the realignment of the hoof pastern axis. This shoe has a set down bar which makes it easy to fit on a foot with a prominent frog.

This shoe offers a more stable platform for the horse than a wedge pad, increasing stability and reducing the flex in the foot.

### Jim Blurton egg bar

Oval shaped shoe and is usually used on horses with pre-navicular and navicular disease.

The shoe has a considerably enlarged heel-bearing surface and is usually applied to the front feet with a rolled toe. Recently, egg-bar shoes have been fitted to hind feet, as the extended heel surface gives support to horses with hock problems.

### Jim Blurton heart bar

---

Designed to offer maximum support to the foot and coffin bone whilst offering the farrier a shoe that is superbly balanced and easy to fit.

Heart-bar shoes can be used to help treat laminitis and flat feet.

The shoe mimics the unshod foot, as the frog and wall are restored to a natural pattern of weight bearing. The support offered to the coffin bone is crucial for speedy recovery and realignment.

### Jim Blurton straight bar

---

Offers support to the heel and frog, spreading the weight evenly throughout the foot.

The bar runs directly between the two heels, enlarging the ground-bearing surface at the back of the foot.

Ideal for competition horses, as the bar does not protrude excessively at the back of the foot.

### Jim Blurton sport hind

---

A bar shoe specifically designed for the hind foot. With plenty of nailing choices, quarter clips and counter-sunk stud hole placement, these bar shoes are ideal for horses – including those competing – who need the extra support on the hind feet.

## EasyShoe Performance NG

Three clipped front

Flexible urethane horse shoe, light and supportive for horses that need an alternative to metal shoes.

- A glue-on horse shoe that can also be nailed
- Two integrated nailing plates within the sole allow the shoe to accept up to 8 nails
- Heels of the shoe can move independently to allow foot to expand and contract with each step
- 3 toe clips keep the shoe in place without extending break-over
- Translucent material allows the white line to remain visible during application
- Optional spacer kit (right) allows you to open the back of the shoe to the desired width to aid the nailing on process

Optional spacer kit

Size (front)	Width (mm)	Length (mm)

# SPECIALIST SHOES

## Ibex BabiCuff foal extension shoes

- For aiding the correction of deviations in foals
- These cuffs have an aluminium egg bar insert to give strength to the cuff and allow some limited shaping
- Each cuff has toe, heel, lateral and medial extensions. The farrier or vet cuts or rasps off the three extensions not required
- Use your choice of existing hoof glue to affix to the hoof - polyurethane, epoxy or acrylics

Size	Width (inches)
1	1 ½ - 2
2	2 - 2 ½
3	2 ½ - 3
4	3 - 3 ½

## Dalric Flaccidity foal shoe

For foals with weak flexors.

- Easy to apply
- Dramatic results
- Prevents crushed heels
- Prevents the usual heel bruises and abscesses
- Establishes proper joint alignment

Size	Width (inches)
D1	2
D2	2 ¾
D3	3 ¼

## Dalric Extension foal shoe

Designed to correct axial limb malformation in foals. The enlarged sole platform supports the foal's leg more than just on the propulsion surface of the hoof. The weight-bearing region of the sole is displaced, and the hoof adjusts to a new centre of gravity.

One-sided extension of the heel support encourages the foal to align the toe.

Should not remain glued onto the hoof for longer than 3 weeks.

### Size

### Width (mm)

Ext 1	55 - 70
Ext 2	70 - 80
Ext 3	90 - 100

## Nanric foal extension shoe

Foal extensions made of lightweight and easy-to-use ABS plastic.

Used for correcting lower limb deformities in very young foals. Can be applied with Vettec SuperFast or EquiloX adhesives.

# SPECIALIST SHOES

## Dalric Club Foot foal shoe

For use in early stage of club foot syndrome. Most club feet develop 4-8 months of age. Early detection is vital for maximum results. Protects the coffin bone from trauma.

- U Easy to apply
- U Quick results
- U Reduces strain of deep flexor
- U Prevents bruising and abscesses
- U Reduces dish formation

Size	Width (inches)
B0	Up to 2
B1	Up to 2 ¾
B2	Up to 3 ¼

- U A classic shoe that has double heels for high country station work
- U Steel shoe available in hinds only

Size (hind)	Width (inches)
2x0	4 ¾
0	5
1	5 ¼

## Razer shoes

RW toe clipped front

SP toe clipped hind

Razer shoes are made of a special tempered tool steel that allows the shoe to flex to support the natural movements of the hoof.

The Razer concept was designed to mimic the natural function of the hoof while offering the protection needed for today's performance horses. This flexible tool steel was developed specifically for the Razer shoe concept.

The shoes were developed in Sweden in 2003 and have been the leading edge in the Standardbred racing industry. The technology was brought to the United States in 2005 to the American Standardbred racing industry.

In 2012, the shoe was redesigned. The toe was rounded and a rounded rim was added to enhance traction while reducing stress and the shape was redesigned to fit various horses, while still retaining all the flexibility of the original design.

Razer shoes come in a front (RW) and hind (SP) version. The hind is a popular choice for Standardbred horses. Razer's special tempered steel is almost as light as aluminium and much stronger than traditional steel shoes.

Size (front)	Width (inches)
RW 3x0	4 $\frac{1}{4}$
RW 2x0	4 $\frac{1}{2}$
RW 0	4 $\frac{3}{4}$
RW 1	5

# FOOT TOOLS

## Hoof nippers

Spring open

Spring compressed

### Spring loaded hoof nippers

---

- U 12" stainless steel spring loaded nippers to make the job easier
- U These are ideal for one handed use - when trimming foals or when you need to hold the leg in one hand and trim with the other
- U The internal spring is hidden away inside the jaws to keep it clean and protected
- U External screw locks the nippers when not in use

### GE hoof nippers

- U The premium hoof cutters for the professional
- U Made in the USA, the GE brand sets the standard for hoof nippers and other farrier hand tools
- U Available in 12", 14" and 15"
- U Also available in GE Easy Nippers, sizes 12", 14" and 15" and Racetrack nippers 14"

### Viking 14" hoof nippers

- U A mid-priced reliable nipper for trimming hooves
- U Very sharp blades which make hoof trimming a breeze
- U Made in the USA

### Nordic Forge 14" nippers

- U These 14" long professional nippers feature a wide 1" flat head and thin heat-treated jaw
- U Also has cushion-grip handles
- U Exceptional value

### Mustad 14" nippers

- U Precision machined and feature a hardened cutting edge to provide the best possible trim
- U The edge stays sharper due to specially designed stops which prevent the blades from meeting just before cutting
- U Rounded corners and strengthened jaw provide superior durability and a solid feel

## FOOT TOOLS

### Diamond 15" nippers

- U Cuts through horses hooves with ease.
- U Provides great leverage and smooth cutting
- U Diamond is a traditional brand for mid quality farrier tools
- U Has a button rivet

### Kahn Forge 15" hoof nippers

- U Come polished, sharp and ready to work
- U A great purchase for both quality and affordability
- U Feature a smooth mechanism and cut efficiently and accurately

## Half round hoof nippers

### GE 12" half round nippers

- U Designed originally for use in hoof wall work and clip placement
- U This tool is excellent for getting to those hard-to-get-at places on the hoof

## Nail nippers

### Kahn Forge 12" nail nippers

- U Polished finish, sharp and ready to cut
- U Features a sharp bite for cutting nails during clenching
- U Saves rasping and damage to your pull offs
- U Includes an internal magnet to easily collect and dispose of sharp nail ends safely

For a quote on international orders, contact us.

**[sales@p3equestrian.com](mailto:sales@p3equestrian.com)**

## Knives

**Jim Blurton drop blade knife**

Effortless cutting and very sharp.

**Jim Blurton straight blade knife**

Available in left or right handed options.

**Jim Blurton loop knife**

Ideal for the horse's frog and particularly effective on hard feet during the dry summer months.

**Jim Blurton abscess loop knife**

Perfect for farriers and vets for accurate precision work such as removing abscesses and hoof wall resections.

### Maurer Forge knives

- U Maurer Forge drop blade – a beautifully hand made hoof knife
- U Unique wooden handles crafted from a variety of American woods
- U Available in regular handle or thin handle option for those who like a tighter grip or have smaller hands
- U Right handed

### NC Red Boy loop knife

- U Ideal for trimming frogs and paring the sole
- U Can be used left or right handed
- U Very sharp blade
- U Colourful wooden handle which distinguishes itself from many other knives on the market today

### Friedr. Dick Ascot hoof knife

- U The knife of choice for many experienced barefoot trimmers around the world. Perfect for professionals and those starting out with barefoot
- U High-quality special carbon steel with ergonomic rosewood handle
- U Available right or left-handed

### Friedr. Dick Ascot 100mm toeing knife

- U Made in Germany from top quality materials
- U Trim frogs (particularly dried out and hard frogs), sole and hoof wall using a hammer
- U Full length including plastic handle is 280mm, length of blade 100mm
- U Height at cutting blade 30mm

# FOOT TOOLS

## Hall hoof knives

The Hall knife uses high carbon steel that is heat treated and tempered through a time consuming, exacting process. This is done to a level that provides the best edge retention and ease of sharpening. After treating and assembly, each blade is skillfully hand sharpened to provide a superior trim of the frog & sole of the foot.

## Hall loop knife

## Hall abscess knife

Available in large and small.

## Hall right-handed curved blade knife

## Hall right-handed drop blade knife

## Knife sharpeners

### Paul Mitchell knife sharpener

- U Premium Diamond sharpener for a perfect cutting edge
- U Double ended, with its tapered conical end (6mm - 1mm diameter) fitting the smallest of loops to the largest
- U Always use with oil

### Swiss knife sharpener

- U The knife sharpener preferred by many hoof-care professionals around the world because it really works!
- U Easy to use quality sharpener ideal for use on quality farrier knives and also scissors, household knives, fishing hooks and even tin openers
- U Made in Switzerland

### Save Edge knife sharpener

- U An industrial diamond grit sharpener for hoof knives
- U Features a broad blade and rounded corners to promote efficient sharpening
- U A popular choice for hoofcare professionals

## Rasps

### Save Edge rasps

### Save Edge Original 14" rasp

- U This is currently our best selling hoof rasp
- U The rasp of choice for professional farriers
- U Manufactured with one rough side to rasp the bulk of the horn away and one smoother side to give a clean finish and remove rasp marks
- U Tanged end for fitting a rasp handle (handle not included)
- U Made in the USA

### Save Edge 14" and 17" Beast rasp

- U Extra wide compared to the regular Save Edge rasp
- U Fewer strokes when trimming the hoof
- U Easier to level the hoof
- U For farriers doing lots of trims, the Save Edge Beast Rasp is a labour saver

### Save Edge 14" Final Touch

- U The specially designed teeth on both sides produce a show quality finish on the hoof

### Save Edge Photo Finish rasp

- U The Save-Edge Photo Finish rasp combines the famous Save Edge 'rough' side with a smooth finishing rasp on the other

## Bassoli rasps

14" Italian made Bassoli rasps, available individually or in boxes of six. Their tangs fit all of our rasp handles.

### Bassoli farrier rasp

- U Consistently sharp and durable
- U Has a rough cut side and a smoother side for finishing

### Bassoli Black farrier rasp

- U Exceptional cutting ability
- U Designed with the busy farrier in mind. The rough side rivals competitor products to remove hoof wall with minimal effort while the smooth side gives a nice finish
- U Black coated to extend the life of the rasp and give a clog-free cut

### Bassoli Blade rasp

- U Has established a reputation amongst farriers worldwide and is the rasp of choice for many
- U Cuts through hoof with ease
- U Black coating helps reduce the teeth clogging up
- U One rough side and one smooth side

### Bassoli finishing rasp

- U Designed for producing a perfectly smooth finish to the hoof wall, free from rasp marks
- U Both sides are engineered for the final finish as opposed to having one side dedicated to removing larger volumes of the hoof
- U Produces a show finish for show ponies or for presenting yearlings and young stock for the sales

## Heller Legend 14" rasp

- U White tang rasp used by farriers
- U Has one rough side for removal of hoof wall and a smoother side for tidying up and removing rasp marks
- U Tanged for fitting rasp handle (handle not included)

## Heller Red Tang 14" rasp

- U Especially well suited for rasping dry, hard hooves
- U Sharp file side allowing for easy removal of material with little effort

## Heller GR8AT White Tang 14" Rasp

- U 8 rows of teeth on the coarse side
- U An easier rasping experience whilst still offering a similar sharpness and cutting result to other Heller rasps
- U Each rasp has a cardboard sleeve to protect the teeth whilst the rasp is being stored or shipped
- U The tanged end fits any of our regular hoof rasp handles - either screw on or drive on
- U Sold individually or in a box of 5

## Pferde 14" hoof plane

- U Pferde hoof plane - 14"
- U This isn't your normal hoof rasp
- U The innovative manufacturing process involves milling and hardening to make the hoof plane exceptionally long lasting compared to regular hoof rasps

### Mercury Deluxe rasp

- U Economy hoof rasp
- U Available individually or in boxes of 6 rasps

### Vallorbe 912 14" rasp

- U Made in Switzerland
- U Includes an aggressive rasping side and a finishing side for a smooth finish

## Rasp covers

### Leather rasp cover

- U Protective leather cover for 14" rasps
- U Keep your rasp clean and dry when it's not in use

## Sanding rasps

### Viking sanding rasp

- U For an immaculate finish on the outer hoof wall
- U Remove rasp marks, blemishes and imperfections from the hoof wall when clenching, trimming or in competition environments
- U The sanding rasp comes with 3 velcro sanding removable belts. Replacement belts of various grits are also available

## Hoof Buffers

### VFT sanding belts

Fits the Viking sanding rasp. Sold in packs of 10.

Available in:

- U 60 grit (roughest)
- U 120 grit (finer)
- U 220 grit (finest)

### Hoof buffer attachment

Drill attachment. Makes the sanding of the hoof wall quick and easy to leave a smooth finish.

Comes complete with sanding attachment, bladder and 1 x 100 grit belt.

### Bladders for hoof buffer attachment

Replacement bladder fits inside hoof buffer attachment.

### Replacement belts for hoof buffer attachment

Available in:

- U 60 grit, 80 grit and 100 grit

## Rasp handles

### Equithotics rasp handle

- U Equithotics drive-on rasp handle, available in a variety of colours
- U Ergonomically designed for comfort and grip
- U Fits all the rasps we sell

### Lutz wooden screw-on rasp handle

- U Smooth wooden rasp handle designed to fit snugly into the hand
- U Fits most rasps, just screw on to add stability and comfort as you work

### Save Edge screw on rasp handle

- U Screw-on rasp handle for Save Edge rasps
- U Will fit most other brands of rasp

## Wire brushes

### NZ made wire brush

---

- U New Zealand made wire brush with stainless steel bristles
- U Ideal for in the tool box to clean off the feet/soles

### NZ made wire brush with arch handle

---

Great for use on feet or hot shoes.

### Flat soft wire brush

---

Ideal for using on the horse's hoof.

### Heavy duty wire brush with handle

---

## Pull-offs

### GE Easy pull-offs

- U Top quality farrier pull-offs
- U For pulling off shoes during the shoeing process
- U Made in the USA by GE Forge & Tool
- U Available in 12" and 14" lengths

### Nordic Forge pull-offs

Made in USA and represents exceptional value for money.

### Diamond 12" pull-offs

Has an exclusive pattern with sharp teeth on outside edges for ease in spreading most shoe sizes and styles.

### Mustad 14" pull-offs

Made of good quality steel for durability and sharpness for safe, efficient removal of shoes.

## Nail pullers

### GE crease nail pullers

---

Made in the USA, these nail pullers from GE are a premium product for the professional farrier.

### Mustad crease nail pullers

---

- ⌚ Mid-quality nail pullers that give a good grip
- ⌚ Used to pull nails out of shoe before removing shoe
- ⌚ Blackened steel finish

### Kahn Forge crease nail pullers

---

- ⌚ 12 inches in length
- ⌚ A mid priced polished farrier tool
- ⌚ Fits snugly inside the crease/groove of the horseshoe so you can grab two sides of a horseshoe nail. With a little gentle leverage the nail can be loosened in the shoe and then pulled out. This method allows a single nail to be removed from the shoe without necessarily removing the shoe away from the hoof

## Nailing-on hammers

### Flatland Forge nailing-on hammer

Quality nailing-on hammer with wooden handle from Jim and Kathleen Poor, USA.

- U Available in 8 oz, 10 oz, 12 oz and 14 oz weights

### Cavalry nailing-on hammer

With an octagon shaped face, the NC Tool Cavalry hammer is perfectly balanced. Slim handle for smooth strokes with little or no vibration.

- U Made with the finest tool steel in the USA

### NC two shelf tool box

- U 3 nail compartments, large rubber-matted aluminum tool tray, and 2 rasp holders
- U Steel legs with 3" swivel casters
- U Weight 21 lbs/9.5kg, box height 25", overall height with handle 33 1/2", top tray 8" x 16", tool tray 11" x 16"

## Hoof stands

### Hoofjack

Hoofjack is designed to support the horse's foot through all phases of shoeing, trimming, treatment and daily care. Hoofjack provides a stable support for the horse to rest its foot on, allowing the horse to feel comfortable, secure and relaxed.

The Hoofjack base has two magnets for holding tools and nails and comes with one standard cradle, and one straight post with standard rubber cap. Free 40 minute Hoofjack instructional video included.

Trim and rasp without putting the hoof between your knees or supporting the horse with your body. Take your mind off your back and knees and put it back into your work.

Some models are special order only.

#### Standard Hoofjack

- U Accommodates a pony up to a small draft or draft cross
- U The standard base is 12" in height and has a base diameter of 18"
- U Overall height adjustment is 14" - 22"
- U Available in green, pink, purple or red

#### Medium Hoofjack

- U Has the same base diameter as the Standard Hoofjack but is 3" shorter
- U The medium Hoofjack can be used in place of the standard Hoofjack or it is ideal for small ponies, horses with limited range of motion or for users under 5'10" wanting to use Hoofjack for the front feet
- U The medium base is 9" in height and has a base diameter of 18"
- U Overall height adjustment is 11" - 19"
- U Available in green, pink, red or purple

### Mini Hoofjack

- U Shorter and narrower than the standard Hoofjack. The mini base is 7" in height with a base diameter of 13"
- U Overall height adjustment is 8" - 12"
- U Available in green, pink, red or purple

### Geriatric Hoofjack

- U Intended for horses with severely limited range of motion that would normally require you to work off the toe of your boot
- U Utilises a mini base which is 7" in height with a base diameter of 13"
- U Overall height adjustment is 8" - 13"
- U Available in green, pink, red or purple

### Draft Hoofjack

- U For use on hooves larger than a size 7
- U Includes a larger hoof cradle
- U The standard base is made of linear polyethylene which is 12" in height and has a base diameter of 18"
- U Overall height adjustment is 14" - 22"

### Combo Hoofjack

- U Consists of one standard base, one standard cradle, one standard straight post, one draft cradle and one draft straight post, making it ideal for people with small ponies through to large draft horses

## Check out our huge range

of farrier products – online, in store or by phone.

### Aluminium farrier truck drawers

Aluminium drawer unit for use in the farrier truck or trailer. Can fit tools, farrier equipment and gear.

- U Smooth runners
- U Stay-shut drawers
- U Long lasting design

A close-up photograph of a horse's lower legs and hooves. The horse's coat is a rich chestnut or bay color with some darker, mottled patterns. The hooves are dark, almost black, and have a glossy sheen, likely from hoof oil. The horse is standing on a light-colored, textured surface, possibly concrete or stone. The background is blurred, showing more of the horse's legs and the ground.

# HOOF CARE

## Hoof adhesives

### Vettec

#### Vettec Equi-Pak 180cc

Dispensed directly onto the sole and frog, Equi-Pak is a liquid urethane that sets in 25 seconds.

- U Can be used with or without a pad
- U Provides support and protection for thin soled, flat footed horses, absorbs shock
- U Can be filled to ground level for added support in less than one minute
- U No hand mixing, no waste
- U Will not breakdown, impervious to debris and moisture
- U Sole and frog left in great condition

#### Vettec Equi-Pak Soft 180cc

- U About 2X softer than regular Equi-Pak
- U Stays soft (even in cold temperatures)
- U Strong bond to soles sealing out moisture and debris (better than silicones)
- U Use with pads on working horses
- U Perfect for deep commissures and thin soles
- U Can be filled to ground level (w/o a pad) for lameness cases (with limited turnout)
- U Absorbs shock and concussion

#### Vettec Equi-Pak CS 180cc

Infused with copper sulphate, Equi-Pak CS effectively treats most minor cases of thrush.

- U Can be used as a preventative measure during wet seasons
- U Eliminates the need to pick out the feet and apply daily medication
- U Sets in less than 1 minute
- U Allows for faster, thicker hoofwall and sole growth
- U Provides same protection and support as original Equi-Pak

#### Vettec Adhere 180cc

Adhere is a fast-setting urethane adhesive designed to bond aluminum or steel shoes to the hoof and to fabricate hoof wall repairs.

- U Glue on steel, aluminum and most plastic shoes as well as any hoof repair project
- U Initial set time of one minute and final cure time of six minutes
- U Sets hard with a superior bond, but maintains the flexibility necessary at the quarters and heels to allow the natural movement of the hoof

## Vettec Sole-Guard 180cc

- Offers fast and effective protection and support for the unshod foot
- Sole Guard is used to fill the bottom of the foot, creating a protective coating that bonds to the foot for up to three weeks
- Sole-Guard sets firm to protect the unshod foot, but retains flexibility to move naturally with the foot, providing comfort and support

## Vettec SuperFast 180cc

30-second set, all-in-one hoof adhesive.

- Making foal extensions is easy
- Create a custom shoe in minutes
- Hoof repairs completed in minutes

## Vettec mixing guns and tools

## Vettec dispensing gun 180cc

Dispensing gun which is required for all Vettec 180cc products.

## Vettec battery powered dispensing gun 180cc

Battery powered dispensing gun for Vettec products.

Easy to use, quiet and needs fewer hands to operate compared to regular hand guns.

Supplied with two batteries.

### Vettec large mixing tips

Large mixing tips for Vettec 180cc products.

### Vettec Equi-mesh

Support Mesh for packing material, black (6" x 8").

Roll out between the shoe and the hoof before applying EquiPak products.

### Blue foam board

- Easy to apply
- Seals and supports Equi-Pak until set
- Recesses material from ground level for traction
- Evenly distributes material over solar surface
- No material ends up as a "high" point to create sole pressure
- Reduces the time spent holding the hoof up
- Easy to remove

### Contouring plastic for Sole Guard

Translucent lightweight plastic material that can be utilised to push the product into the voids. Particularly useful when applying Sole Guard.

- Used after applying Vettec products to smooth and level the material
- Will not stick to Vettec products and can be discarded after use

## Equilox

### Equilox Adhesive System

Equilox is an extremely strong resin that can be used for anything from repairing small quarter cracks to reconstructing an entire hoof wall, yet flexible enough for easy filing, shaping, and even nailing.

- Comes in: single use 1oz (28.5ml) pots, 40ml tubes, 150ml (5oz) stubbies, and 400ml (14 oz) tubes
- Set time: Sets in 6 - 8 minutes, final cure in 10 - 13 minutes at 21° C (70° F)
- Shelf life: At least 6 months from fill date (as stated on label) — or longer if refrigerated
- Available in black or tan
- We also stock mixing guns in regular and mini size for applying Equilox, as well as mixing tips and applicator sticks

Single use pot

Stubbie 150ml (5oz)

400ml (14oz)  
Side-by-Side Gold

40ml tube

## Equilox mixing guns and tools

### Equilox 400ml dispensing gun

- U Equilox Side-by-Side (Gold) applicator gun
- U Fits Equilox 400ml (14oz) cartridges

### Equilox mini dispensing gun

- U Equilox mini gun is for the Equilox 40ml tubes
- U To use the Equilox 40ml system, you will need: Equilox 40ml tube, Equilox mini gun and Equilox small mixing tips

### Equilox large mixing tips

- U Large mixing tips for Equilox 400ml (14 oz) cartridges

### Equilox small mixing tips

- U 40ml mixing tips for Equilox products
- U The mixing tips attach to the Equilox mini gun for use with the Equilox 40ml tubes

## Hoof-Life

- U Modern adhesive designed to withstand the rigours of competition horses as well as assisting in hoof rebuilding
- U 4 - 6 minutes curing time
- U Available in 420ml cartridges

## EquAcrylic

- U SoundHorse EquAcrylic Adhesive is a two-part adhesive especially designed for use when glueing on shoes or during hoof repair
- U Supplied in a foil pack with the two components mixed in the bag by hand immediately prior to use
- U Available in black or tan

## Silicone

## Vettec Sil-Pak 180cc

Vettec's silicone packing material is automatically dispensed under a pad to cushion, seal and protect the equine foot.

- U Weight bearing in 2 minutes
- U Totally fills and seals all void areas
- U Auto-mixing ensures consistent set times
- U Ensures complete coverage of sole
- U Prevents debris migration
- U Use Vettec 180cc mixing gun and tips
- U Economical application

## Let us know...

if you can't find what you're looking for. We may already have it in stock.

## MV2

### MV2 silicone system

---

A range of 200ml silicones for use under hoof pads for a variety of uses.

Ultra Soft (10 shore A) - recommended for highly sensitive soles.

Enduro (12 shore A) - soft silicone that has four times the mechanical resistance compared to the Ultra Soft. Injected under the pad, the material stays in place and holds its position even under extreme conditions. Ideal for endurance horses and those working on hard or irregular ground.

Comfort & Shock Absorbing (18 shore A) - as the name suggests, enables a shock absorbing cushion under the pad for optimal load distribution to reduce concussion. Ideal for sore horses.

Firm Kinesitherapeutic (25 shore A) - providing kinesitherapeutic support to the sole to help with under-slung heels and to assist with growth of heel.

Hard Kinesitherapeutic (50 shore A) - extra hardness for use on laminitic equines and remedial cases.

# HOOF CARE

## MV2 Dynamic pads

- ⌚ A bi-density hoof pad with shock absorbing properties on the heel
- ⌚ Combines special non-return valves in the pad for the injection of MV2 silicones (using the MV2 mixing tips)
- ⌚ Transparent pad so you can see silicone packing injected under the pad
- ⌚ Fill different zones of the foot with several hardnesses of silicone as required

## MV2 mixing tips

- ⌚ Mixing tips for use with the MV2 silicone system

## MV2 dispensing gun

- ⌚ Dispensing gun for MV2 silicone system

## Hoof repair

## Hoof staples

Pack of 10 steel hoof staples for outer hoof wall crack repair.

Available in sizes:

- ⌚ 3/16" (5mm)
- ⌚ 1/4" (6mm)
- ⌚ 5/16" (8mm)

## Hoof repair fabric

For use with acrylic and adhesives when repairing hooves. 12" in length.

These fabric materials can be cut into shape and used to add strength to a hoof repair when using glues.

Available in three types:

- Polyester - high strength braid (1 1/2" tube)
- Cobrasox - ultra high strength braid (carbon fibre/kevlar) (1 1/2" tube)
- Poly-Vectran - abrasion resistant, high strength braid (polyester/liquid crystal polymer) (4" wide tape)

## Farrier shears

High carbon steel, Rockwell 72 degrees, hard chromed with high leverage grips and short powerful serrated jaws.

Ideal for cutting hoof repair fabric.

## HSP hoof support patches

The HSP, which was designed by farriers and the locomotor research group at the Royal Veterinary College, is a device that increases the bending strength of the equine hoof wall and thereby helps to prevent collapse and deformation.

An HSP is bonded, using standard farriery adhesives, to the hoof wall on each side of the heel following basic preparation.

Sold in packs of four.

## Hoof crack sutures

- Suture kit for repairing cracks in the hoof wall
- Kit contains 8 stainless steel sutures with backing plates, pre-threaded and 8 extra stainless steel backing plates

## Hoofcast

Hoofcast is a versatile hoof cast system which is simple to apply yet very effective.

Applied in a similar way as you would apply a regular hoof bandage, Hoofcast sets hard within minutes with the finished result similar to a cast applied to human broken bones.

Hoofcast can be applied within minutes by vets, farriers or horse owners for:

- U Adding a temporary hoof dressing for foot injuries
- U Providing comfort to tender footed horses (or those transitioning to barefoot)
- U Support to the hoof wall in laminitic and founder cases
- U The repair of poor or damaged hoof wall
- U To keep a loose shoe in place in an emergency
- U Temporary protection to the hoof when a shoe is lost
- U Hoofcast can be used on a barefoot horse, under a shoe (the farrier can nail through it) or over a shoe to help hold the shoe in place

One roll per hoof is required and available in:

- U 2" (50mm) wide
- U 3" (75mm) wide
- U 4" (100mm) wide

## Aluminium crack plate

Ideal for glueing or screwing onto the hoof wall to assist with the repair of difficult cracks.

- U 3 1/4" x 2" (83mm x 50mm)
- U Glue or screws not included

## Hoof screws

Set of 40 small screws for screwing hoof repair plates, patches or other crack repair devices to the outer hoof wall.

Mixed sizes and head types.

## Michael Puhl hoof clip

---

For repairing cracks, the regular PM Hoof Clip has a mechanism that can be tightened or expanded for maximum control of crack stability levels.

The stainless steel clip comes complete with 2 attachment screws and wrench for adjusting the tightness of the clip.

Regular hoof clip

Heel hoof clip

Butterfly hoof clip

Toe hoof clip

## Hoof packing

### EquiFlex-Pak

- ⊙ The SoundHorse 2-part silicone packing is specifically designed for the rigors of hoof packing application and is "gas permeable". This unique property allows treatment materials (e.g. copper sulphate) when mixed with the silicone to slowly pass through the cured silicone as a treatment
- ⊙ Two-part silicone, 1:1 mix ratio with a quick set time
- ⊙ 3lb (1.36kg) boxed kit

### Copper sulphate crystals

- ⊙ Ideal for use with EquiFlex-Pak or other hoof packing to treat thrush

### Michael Puhl hoof packing

PM Hoof Packings are high-tech two-component silicones that are easy and clean to work with (you do not need gloves). Compared to many other hoof packings on the market the PM hoof packings do not stick to hoof and pad and do not hamper the foot's natural function and balance in locomotion.

Available in regular and soft. The PM Hoof Packing Soft is soft, lightweight and shock absorbing, ideal for feet that are sensitive to sole pressure.

Extremely lightweight and particularly shock-absorbing 'high tech' A+B component kneading silicone. Mixture ratio 50:50, curing time: 2-3 mins.

Particularly appropriate for coffin joint inflammation and generally sensitive hoof sole, for navicular syndrome, corium inflammation, diseases of the deep digital flexor tendon, contracted and under-run heels, coffin joint arthritis, laminitis/founder and hoof cracks.

The PM Hoof Packing Soft has also been tried and tested in combination with hoof boots as an additional insole. It ensures that the boot fits perfectly with optimal shock absorbance and pressure distribution.

MP Soft available in:

- ⊙ A+B 0.7kg and 1.4kg

MP Regular available in:

- ⊙ 1.5kg

## Hoof pads

### Castle frog support pads

Hoof pad with raised frog piece to apply pressure to the frog.

Available in:

- U Flat
- U Wedge

Available in sizes:

- U Medium
- U Large

### Black rubber hoof pads

- U Provides cushioning and protection
- U One size fits all - cut to size with your hoof nippers or a sharp knife
- U 6" wide x 6 1/2" long
- U Sold by the pair

### Castle Plastics mesh pour pads

Firm plastic mesh pads for use with liquid hoof packing materials.

Size: 6" wide x 6 1/2" long.

### Castle oval wedge pads

Urethane wedge pads available in 1, 2 and 3 degree wedges.

Size: 6" x 7".

Michael Puhl flat pads

The PM flat pad is an aid to eliminate increased strain on tendons, heels and soles.

To restore the hoof-balance by pressure distribution.

Tendon-supporting effect due to frog-shaped concavity – leading to a statics/balance improvement similar to the one of a closed-bar shoe (e.g. egg-bar shoe). The empty space between hoof and the PM Hoof Pad Flat can then be filled with PM Hoof Packing, Regular or Soft.

Size	Width	Length	Thickness
One size	180mm	183mm	3mm

Michael Puhl wedge pads

To restore the hoof-balance by enlarging the weight bearing area.

Tendon-supporting effect with frog-shaped concavity. An extra benefit of the PM wedge pad is the enlargement of the weight bearing area of the heels that results in an optimized weight and pressure distribution. By lowering the heels, the weight-bearing area is substantially increased.

Available in medium and large sizes and can be cut to shape.

Size	Width	Length	Thickness
Medium	145mm	150mm	9mm
Large	180mm	185mm	10mm

## VFT Supreme pads

Viking Farrier Tools' revolutionary Supreme hoof pads provide support, protection, shock absorption and comfort.

The pads have a concave sole which allows for some grip when the horse is working on soft surfaces, and the frog support allows the pads to flex over the frog whilst offering support.

All pads have one way silicone application ports in the ground surface. Most common cartridge based silicones and liquid hoof padding materials (Vettec EquiPak, MV2 etc) can be applied once the pad is in place on the foot.

Available in:

- U 30 shore (blue) is the softest pad in this range
- U 50 shore (green) is medium rated
- U 70 shore (orange) is the firmest of the types

Comes in two sizes:

- U Regular (135mm)
- U Large (165mm)

## Shocktamer pads

Shocktamer horse hoof pads feature a dual density polyurethane which allows the pad to both absorb and dissipate concussion.

The grey material is raised slightly above the black and absorbs concussion, while the harder black material dissipates it away from the hoof and the leg.

Available in:

- U Medium: 150mm x 140mm, 4mm thick

## Razer ProPad

The Razer ProPad has been designed with a flexible frog-support to fill the void between hoof frog and ground when the horse is shod.

ProPad can reduce injuries and increase performance.

Can be used with the Razer horseshoes or with other brands of shoe.

Available in:

- U Support small: 4 7/8" x 5 3/8"
- U Support medium: 5 1/2" x 5 7/8"
- U Soft Support small: 4 7/8" x 5 3/8"
- U Soft Support medium: 5 1/2" x 5 7/8"
- U Soft Support large: 6" x 6 3/8"

## TTM frog support pads

A high quality pad with added frog support.

Available in:

- U Flat medium: 5 1/2" x 5 7/8"
- U Flat large: 6 1/4" x 6 1/2"
- U Wedge medium: 5 1/2" x 5 7/8"
- U Wedge large: 6 1/4" x 6 1/2"

## Kerckhaert blue race pads

Size: 6" x 6 1/2".

### Hospital open-up pad

This hospital pad is made from a hi-tech material and has a cap (to enable cleaning and medication of the wound) that can be fixed and removed with the special key provided.

Size: 7 1/4" x 8 1/4".

### Luwex flat pads

Made from a proven shock absorbing material.

The integrated mesh is great for applying hoof packing materials (EquiPak etc).

Available in:

- U Flat: 6 1/2" x 6 1/2"
- U 2 degree wedge: 6 1/2" x 6 1/2"

### Castle draft horse XXXL pads

For the larger horse.

Size: 9 3/4" wide x 9 3/4" long, 5/16" thick.

### Keystone leather pads

Leather conforms naturally to the hoof and allows breathability for the hoof sole while maximising protection.

Size: 6 1/2" x 7 1/4".

## Flip flop pads

For the harness racing horse with sore knees.

Open eye design makes it easier to clean under the pad when it is on the foot.

Available in:

- U Size 1: 4  $\frac{5}{8}$ " x 5  $\frac{1}{4}$ "
- U Size 2: 5" x 5  $\frac{3}{4}$ "
- U Size 3: 5  $\frac{1}{4}$ " x 6"
- U Size 4: 5  $\frac{4}{3}$ " x 6  $\frac{1}{2}$ "
- U Size 5: 6" x 7"

## Plastic heel wedges

Used for raising the heel.

Available in:

- U Size 2 (5  $\frac{1}{16}$ " x 4  $\frac{9}{16}$ ", 11mm thick at heel)
- U Size 4 (6  $\frac{3}{16}$ " x 5  $\frac{3}{16}$ ", 12mm thick at heel)

## Thermo pads race & sport

When heated, thermo pads become mouldable to follow the contours of the sole and frog providing protection, support and comfort.

Available in:

- U Sport (blue): 14 x 14cm
- U Sport (blue): 20 x 20cm
- U Race (white): 14 x 14cm
- U Race (white): 20 x 20cm

## EVA system pads

Used to treat laminitis. Designed to minimise shock and reduce leveraging at point of breakover.

Available in:

- U Size 000: 4  $\frac{1}{4}$ "
- U Size 00: 4  $\frac{1}{2}$ "
- U Size 0: 4  $\frac{3}{4}$ "
- U Size 1: 5"
- U Size 2: 5  $\frac{1}{4}$ "

## Styrofoam support pads

Pre-cut, hoof shaped pads made of a very dense Styrofoam. When applied, the Styrofoam compresses into the caudal portion of the foot and offers the horse comfort, support, and protection. Excellent for use with laminitic horses and ponies.

Available in:

- U Small: 5" x 5 1/2", 48mm thick
- U Medium: 5 1/4" x 6", 48mm thick
- U Large: 5 1/2" x 6 1/2"
- U XL: 6" x 7"

# HOOF CARE

## Kevin Bacon's

### Kevin Bacon's Hoof Formula supplement

- U Arguably the best performing hoof supplement available in NZ
- U Highly palatable
- U Contains a broad range of ingredients for improved hoof growth

## The results speak for themselves

### Kevin Bacon's Liquid Hoof Dressing

- U 100% natural ingredients
- U Made in Belgium
- U Helps maintain moisture content within the hoof
- U Integrated brush inside the lid
- U Available in 1 litre and 500ml

### Kevin Bacon's Natural Hoof Dressing

- U The original hoof dressing in the range
- U In balm form - apply using brush
- U Available in 1 litre, 2.5 litre, and 5 litre tubs

## KEVIN BACON'S HOOF SOLUTION

To keep the foot healthy, apply Kevin Bacon's Hoof Solution onto the frogs and soles before fitting pads.

### Kevin Bacon's Hoof Solution

- U Very effective for treatment and prevention of thrush
- U 100% natural ingredients
- U Non-toxic
- U Also effective for over-reaches

### Kevin Bacon's Active Soap

- U For treatment of itchy horses
- U Repels external parasites
- U 100% natural ingredients
- U Applied with sponge (included)

## Hoof treatments

### Keratex

#### Keratex Hoof Hardener (250ml)

- Apply to the outer hoof wall
- Improves the strength of the hoof
- Works well for thin soled horses
- A popular seller

#### Keratex Mud Shield Powder (450g)

- For mud related conditions
- Easy to use puffer bottle
- Anti-bacterial
- Applied to legs for protection

#### Keratex Hoof Putty (200g)

- For plugging holes and cavities in hoof
- Slowly releases anti-bacterials
- No need for pad or shoe

## White Lightning

### White Lightning gel 60ml

- U Eliminates seedy toe and thrush
- U Multiple treatments per bottle
- U Safe to use – doesn't attack healthy tissue
- U Easy to use squirty bottle
- U No need for soaking, just apply and leave to work for 35 minutes

### White Lightning liquid 8oz

- U When mixed, produces a gas which is very aggressive in neutralising bacteria, fungus and yeast
- U Effective in the treatment of minor cases of seedy toe (white line disease) and thrush in horses hooves
- U Harmless to healthy tissue

## Magic Cushion

### Magic Cushion 4lb (1.8kg)

- U Hoof packing
- U Helps relieve symptoms associated with concussion and trauma
- U Soothing relief
- U Fast acting, long lasting

### Magic Cushion Xtreme 4lb (1.8kg)

- U Hoof packing
- U Higher concentration of active ingredients than regular Magic Cushion
- U Calms sore soles and frogs

# HOOF CARE

## Hawthorne

### Hawthorne Hoof Freeze 8oz

- ⊖ Prevents and soothes pain and soreness in hooves
- ⊖ Apply prior to racing or competing

### Hawthorne Sole Pack paddies 2oz

- ⊖ Continuous medicated relief for dry hard hooves
- ⊖ Combats bacterial and fungal infections
- ⊖ Fast acting, quick penetrating

### Hawthorne Sole Pack 4lb tub

Same formulation as Sole Pack paddies but in a convenient bulk 4lb tub

### Hawthorne Sole Pack liquid

- ⊖ Medicated liquid hoof dressing
- ⊖ Combats bacterial and fungal infections

### Hawthorne Wind Aid 32oz

---

- ⌚ Relieves coughs, allergies and minor breathing problems
- ⌚ Administered orally
- ⌚ One dose is 2oz

### Hawthorne Wind Aid 1oz

---

- ⌚ Concentrated 1oz tube – single dose
- ⌚ Relieves seasonal allergies, coughs and respiratory tract problems

### Thrushbuster (2oz)

---

- ⌚ For use on frogs against thrush
- ⌚ Squirty bottle
- ⌚ A popular seller

### NT-Dry 70g

---

- ⌚ For treatment of thrush
- ⌚ Fast and effective
- ⌚ Dry application from puffer bottle

Hoof and soak boots

New Mac hoof boots

An all-purpose boot featuring a unique performance outsole and incorporating the patented Hoof Suspension System. It is an ideal equine hoof boot option for riders with horses in light work (less than 40 km per week). It may also be used as a horse therapy boot aiding those suffering from arthritis, pedal bone fractures, navicular disease, ringbone, laminitis (founder), bruised soles, or overreaching.

Boot size	Width (mm)	Length (mm)
2	110 - 115	115 - 120
3	115 - 120	120 - 125
4	120 - 125	125 - 130
5	125 - 130	130 - 135
6	130 - 135	135 - 140
7	135 - 140	140 - 145
8	140 - 145	145 - 150
9	145 - 150	150 - 155
10	150 - 155	155 - 160
11	155 - 165	160 - 170
12	165 - 175	170 - 180

Comfort Pads

EasyCare EVA foam comfort pads are designed to fit inside Old Mac’s hoof boots to provide additional comfort and shock absorption. They are excellent for horses who are sore and need extra softness and/ or frog support.

The pads come in two thicknesses - 6mm or 12mm and may be stacked inside the boots.

## Cloud Therapy Boots

Acclaimed "The Most Robust Therapeutic Boot In The World", the Easyboot Cloud offers relief, support and increases comfort to equines suffering from laminitis, bruising of the sole, working on hard ground, hoof infections and chronic lameness. The instant and ongoing relief encourages movement and therefore recovery following injury or surgery.

Boot size	Width (mm)	Length (mm)
1	108 - 124	117 - 130
2	124 - 133	130 - 136
3	133 - 149	137 - 150
4	149 - 159	150 - 159
5	159 - 170	159 - 170

## EasySoaker

Perfect for a variety of applications where protection or treatment of the hoof is required:

- U Soaking and poulticing
- U Conditioning
- U Providing a clean, protected environment
- U Holding medication at wound site

Easy open buckle system makes applying and removing the boot a simple process. Textured sole prevents slipping.

Boot size	Width (mm)	Length (mm)
Small	95 - 115mm	108 - 127mm
Medium	115 - 134mm	127 - 146mm
Large	134 - 146mm	146 - 159mm
XL	146 - 159mm	159 - 172mm
XXL	159 - 172mm	172 - 184mm
XXXL	172 - 184mm	184 - 190mm

# EDUCATION

## Books

### American Farriers Journal

American Farriers Journal is the leading journal for farriers in the US and around the world.

Sold per issue. Back issues also available.

### Hickman's Farriery 2nd Ed.

The new edition demonstrates how traditional skills can be combined with modern science to benefit the welfare, soundness and performance of the horse.

Explanations of the underlying structure of the horse's front and hind legs help farriers to better understand the scientific principles of their craft.

## Corrective Farriery Volume I

Edited by Simon Curtis FWCF HonAssocRCVS

The book describes the combining of traditional farriery skills with veterinary knowledge and advanced techniques of repair and shoeing.

## Corrective Farriery Volume II

Edited by Simon Curtis FWCF Hon AssocRCVS

Corrective Farriery Volume II completes a 2-part work covering all aspects of remedial shoeing and the associated background knowledge. Corrective Farriery starts with what is probably the most detailed anatomy of the equine hoof ever published.

## No Foot, No Horse

---

By Gail Williams BA PhD and Martin Deacon FWCF

With full colour photos and diagrams throughout, this widely-acclaimed book explains why everyone involved with horses needs to understand the principles of foot balance.

## The Equine Distal Limb Book

---

By Jean Marie Denoix

This book provides a unique contribution and will be an invaluable reference text. The book is designed for maximum clarity using a generous page size. The atlas will be essential for anybody involved in detailed anatomical study, complex lameness evaluation or advanced imaging techniques.

## Principles of Farriery

By Chris Colles BVetMed, PhD, HonFWCF, MRCVS and Ron Ware FWCF

Essential reading for all trainee farriers and useful reference book for qualified farriers and vets.

Anatomy, shoe-making, modern farriery practice, foot and gait problems and remedial shoeing.

Includes over 400 illustrations with clear colour drawings and diagrams.

## Building the Equine Hoof

By David M Hood, Connie K Swenson and A Bruce Johnson

An excellent 45 page resource with chapters on hoof care, anatomy, growth and nutrition, disorders and diseases.

The standout feature of this book is a series of semi-transparent pages enabling the reader to see where and how the bones fit together inside the hoof.

## Making Natural Hoof Care Work For You

By Pete Ramey

Making Natural Hoof Care Work for You is intended for horse owners, vets and of course, hoof care providers wanting "straight talk" and reliable information on how to "cross-over" into natural hoof care.

## Horse Owners Guide to Natural Hoofcare

By Jaime Jackson

This book features step-by-step instructions for the natural trim based on the wild horse model. Written for horse owners who want to improve their understanding of natural hoof care, and also for farriers wanting to transition to natural hoof care.

## Hoof Problems

By Rob van Nassau

With the aid of over 1000 photographs, internationally renowned expert Rob van Nassau looks at every aspect of hoof care, and describes in detail more than fifty common foot problems.

Highly recommended for professionals as well as horse owners who have a keen interest in hoof care.

## Adams Lameness in Horses 6th edition

The Sixth Edition of Adams and Stashak's Lameness in Horses builds on the book's reputation as the classic gold-standard reference on equine lameness.

Now in full color, the text has been fully revised and streamlined to improve user-friendliness, with a new, simplified format and a stronger emphasis on the diagnosis and management of lameness. It includes a supplemental DVD.

## Farriery - Foal to Racehorse

By Simon Curtis FWCF

This book is for farriers, veterinary surgeons, trainers and breeders. It describes farriery involvement, from the newborn foal to the horse in training and back to the stud farm.

## Gregory's Textbook of Farriery

By Chris Gregory, CJF, FWCF

Gregory's Textbook of Farriery is a tremendous work on the craft and art of farriery. No one involved with horses should be without this great book.

## Horse Anatomy (2nd Ed.)

---

Over 250 original illustrations. An ideal book for farriers and horse owners who want to understand their horse's conformation.

## DVDs

## Natural Balance Shoeing

---

This DVD gives those interested in Natural Balance some comprehensive information regarding Natural Balance hoof preparation, application of Natural Balance Shoes, Pads and Impression Material. It also offers some instruction for horses with mismatched feet, underrun and contracted heels, as well as horses that are base narrow or pigeon toed.

## Shoemaking and Shoeing for Heavy Horses

---

An instructional DVD by Jim and Allan Ferrie.

## The Glass Horse

---

An engaging interactive exploration of the equine distal limb that combines interactive models with informative narrations and highly detailed animations. The interface allows manipulation of anatomical models in three dimensions.

## Natural Balance Hoof Trimming

---

By Gene Ovnicek

This video will give you new insight and direction into the maintenance of the equine foot and the many factors that need to be considered when natural hoof trimming techniques are employed. It will also help you understand the needs of the equine hoof, as well as assist you in determining whether your horse can comfortably go without shoes in his domestic environment and perform at his expected level of use.

## Hoof plastinates

### Hoof SE20

---

This is a thin slice of an equine foot encased in a firm plastic casing making it ideal to have in the truck, classroom or at the stables without getting damaged

### Hoof and lower limb sheet SE30

---

- U Hoof and pastern plastinate
- U A handy piece for farriers, vets and owners
- U Encased in perspex for protection

## 3D hoof models

Foundered hoof

Healthy hoof

### Hinged 3D hoof model - foundered hoof

---

- U Hinge at toe allows you to see inside a foundered hoof, showing rotation of the bone structures
- U Great for explaining laminitis to clients, students and horse owners
- U Freeze dried

Half healthy, half foundered hoof

### Hinged 3D hoof model

---

- U Hinged at the toe to open up displaying bones and other structures within the hoof and lower limb
- U Freeze dried
- U Great for farriers and vets to help with explaining hoof conditions or for riding groups, pony clubs etc
- U A very valuable resource
- U Made in USA

### Hinged 3D hoof model - hybrid

---

- U Hinge at toe allows you to see inside a foundered hoof, showing rotation of the bone structures
- U Great for explaining laminitis to clients, students and horse owners
- U Freeze dried
- U Half foundered, half "normal"

# CLOTHING

## **Flexineb<sup>TM</sup>2**

fast, portable,  
equine  
nebulisation  
device

The Flexineb 2 equine nebuliser can be used to administer antibiotics, corticosteroids, bronchodilators, and natural solutions as advised by veterinary professionals. Flexineb 2 can be applied for treating respiratory conditions and aid in the removal of mucus from blocked airways.

Battery operated - up to 4 hours from full charge.

Spare Flexineb 2 parts available.

- U Simple and integrated: easy set up and operation, no hoses, wires or awkward valves
- U Rapid: 10mls saline aerosolised in less than 12 minutes
- U Silent
- U Adaptable: for use with MDI's/inhalers
- U Operates from a rechargeable battery
- U Generates ideal particles (70% in 2-5micron range) which enables the aerosol solution to penetrate deep into the lower part of the horse's lungs
- U Comfort and tolerance: flexible material fits comfortably onto horse's nose
- U Adjustable lever allows control of exit valve without taking off the mask
