P3 EQUESTRIAN

FARRIER CATALOGUE

2023 - 2024

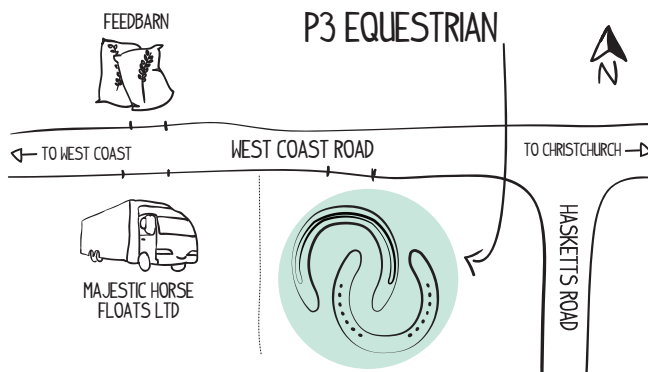

We have been farriers and have a solid understanding of most of the products we stock. If you need help or advice about a product then please ask.

If there's something you need that is not listed in this catalogue then there's a chance we might have it anyway or can source it for you. We import and distribute farrier and hoofcare products from all over the world.

WAREHOUSE

The physical store is open 9am to 5pm Monday to Friday excluding holidays for visitors (out of hours visits by prior arrangement). We are contactable via text, phone, or web, any time.

We are located at:

115 West Coast Road, Yaldhurst, Christchurch 7676, New Zealand

MAILING ADDRESS

P3 Equestrian Limited, PO Box 4558,
Christchurch 8140, New Zealand

SHIPPING

We specialise in mail order.

Target delivery for North or South Island orders is the next working day (2-3 days for bulky items and some rural addresses) for in-stock items.

Saturday deliveries are sometimes available for an extra charge depending on location.

We ship daily to the North and South Islands and to Australia. We regularly ship to other international locations.

PAYMENT

We accept payment by direct credit, Visa, MasterCard, AMEX, cash and EFTPOS.

A close-up, high-contrast photograph of a metal horseshoe. The horseshoe is the central focus, with its curved shape and embossed text clearly visible. The text "KERCKHAERT®" is stamped along the top curve, and "THORO/BRED®" is stamped along the bottom curve. Below this, the words "St. Croix For" are partially visible. The background is a solid, vibrant green, which makes the metallic horseshoe stand out. The lighting creates highlights and shadows that emphasize the texture and form of the metal.

Jim Blurton Remedial Shoes

Remedial shoes to help correct and alleviate foot problems in horses.

A unique feature of these shoes is the pitched nail holes, providing a different angle for each nail and making it easier to nail on.

These shoes incorporate a rolled toe and are safed off at the heel.

Side clips are standard and they have a countersunk position for stud holes.

Size (front)	Width (inches)
3x0	4 ½
2x0	4 ¾
0	5
1	5 ¼
2	5 ½
3	5 ¾
4	6
5	6 ¼

Jim Blurton Graduated Bar

Three degree wedge bar shoes designed to assist in the realignment of the hoof pastern axis. This shoe has a set down bar which makes it easy to fit on a foot with a prominent frog.

This shoe offers a more stable platform for the horse than a wedge pad, increasing stability and reducing the flex in the foot.

Jim Blurton Egg Bar

Oval shaped shoe and is usually used on horses with pre-navicular and navicular disease.

The shoe has a considerably enlarged heel-bearing surface and is usually applied to the front feet with a rolled toe. Recently, egg-bar shoes have been fitted to hind feet, as the extended heel surface gives support to horses with hock problems.

Jim Blurton Heart Bar

Designed to offer maximum support to the foot and coffin bone whilst offering the farrier a shoe that is superbly balanced and easy to fit.

Heart-bar shoes can be used to help treat laminitis and flat feet.

The shoe mimics the unshod foot, as the frog and wall are restored to a natural pattern of weight bearing. The support offered to the coffin bone is crucial for speedy recovery and realignment.

Jim Blurton Straight Bar

Offers support to the heel and frog, spreading the weight evenly throughout the foot.

The bar runs directly between the two heels, enlarging the ground-bearing surface at the back of the foot.

Ideal for competition horses, as the bar does not protrude excessively at the back of the foot.

Jim Blurton Sport Hind

A bar shoe specifically designed for the hind foot. With plenty of nailing choices, quarter clips and counter-sunk stud hole placement, these bar shoes are ideal for horses – including those competing – who need the extra support on the hind feet.

SPECIALIST SHOES

EasyShoe Performance NG

Three clipped front

Flexible urethane horse shoe, light and supportive for horses that need an alternative to metal shoes.

- U A glue-on horse shoe that can also be nailed
- U Two integrated nailing plates within the sole allow the shoe to accept up to 8 nails
- U Heels of the shoe can move independently to allow foot to expand and contract with each step
- U 3 toe clips keep the shoe in place without extending break-over
- U Translucent material allows the white line to remain visible during application
- U Optional spacer kit (right) allows you to open the back of the shoe to the desired width to aid the nailing on process

Optional spacer kit

Size (front)	Width (mm)	Length (mm)

SPECIALIST SHOES

Ibex BabiCuff Foal Extension Shoes

- For aiding the correction of deviations in foals
- These cuffs have an aluminium egg bar insert to give strength to the cuff and allow some limited shaping
- Each cuff has toe, heel, lateral and medial extensions. The farrier or vet cuts or rasps off the three extensions not required
- Use your choice of existing hoof glue to affix to the hoof - polyurethane, epoxy or acrylics

Size	Width (inches)
1	1 ½ - 2
2	2 - 2 ½
3	2 ½ - 3
4	3 - 3 ½

Dalric Flaccidity Foal Shoe

For foals with weak flexors.

- Easy to apply
- Dramatic results
- Prevents crushed heels
- Prevents the usual heel bruises and abscesses
- Establishes proper joint alignment

Size	Width (inches)
D1	2
D2	2 ¾
D3	3 ¼

Dalric Extension Foal Shoe

Designed to correct axial limb malformation in foals. The enlarged sole platform supports the foal's leg more than just on the propulsion surface of the hoof. The weight-bearing region of the sole is displaced, and the hoof adjusts to a new centre of gravity.

One-sided extension of the heel support encourages the foal to align the toe.

Should not remain glued onto the hoof for longer than 3 weeks.

Size

Width (mm)

Ext 1	55 - 70
Ext 2	70 - 80
Ext 3	90 - 100

Nanric Foal Extension Shoe

Foal extensions made of lightweight and easy-to-use ABS plastic.

Used for correcting lower limb deformities in very young foals. Can be applied with Equimix Ultra Fast Hoof Bond & Repair or EquiloX adhesives.

SPECIALIST SHOES

Dalric Club Foot Foal Shoe

For use in early stage of club foot syndrome. Most club feet develop 4-8 months of age. Early detection is vital for maximum results. Protects the coffin bone from trauma.

- U Easy to apply
- U Quick results
- U Reduces strain of deep flexor
- U Prevents bruising and abscesses
- U Reduces dish formation

Size	Width (inches)
B0	Up to 2
B1	Up to 2 ¾
B2	Up to 3 ¼

SPECIALIST SHOES

Denoix Reverse Shoe

Unclipped front

The Reverse Shoe has a wide heel area coupled with narrow toe branches to give "float" to the heel area and allow sinking of the toe. It offers similar benefits to a wedge shoe without the disadvantages.

Aluminium unclipped front shoe.

Size (front)	Width (inches)
6	4 ¾
7	5
8	5 ¼
9	5 ½
10	5 ¾

Denoix Onion Shoe

Unclipped front

The Onion shoe protects the seat of corn from ground pressure.

Provides more "float" to the heel area by limiting heel penetration in soft ground. It offers good heel support with a roll over the toe and collateral aspects of the foot.

Aluminium unclipped front shoe.

Size (front)	Width (inches)
6	4 ¾
7	5
8	5 ¼
9	5 ½
10	5 ¾

Natural Balance

Unclipped front

Quarter clipped hind

- U Drop forged steel shoes
- U Designed around principles of wild horses' hooves
- U The square, rolled toe assists with better breakover

- A classic shoe that has double heels for high country station work
- Steel shoe
- Available in hinds

Size (hind)	Width (inches)
2x0	4 ¾
0	5
1	5 ¼

Razer Shoes

RW toe clipped front

SP toe clipped hind

Razer shoes are made of a special tempered tool steel that allows the shoe to flex to support the natural movements of the hoof.

The Razer concept was designed to mimic the natural function of the hoof while offering the protection needed for today's performance horses. This flexible tool steel was developed specifically for the Razer shoe concept.

The shoes were developed in Sweden in 2003 and have been the leading edge in the Standardbred racing industry. The technology was brought to the United States in 2005 to the American Standardbred racing industry.

In 2012, the shoe was redesigned. The toe was rounded and a rounded rim was added to enhance traction while reducing stress and the shape was redesigned to fit various horses, while still retaining all the flexibility of the original design.

Razer shoes come in a front (RW) and hind (SP) version. The hind is a popular choice for Standardbred horses. Razer's special tempered steel is almost as light as aluminium and much stronger than traditional steel shoes.

Size (front)	Width (inches)
RW 3x0	4 $\frac{1}{4}$
RW 2x0	4 $\frac{1}{2}$
RW 0	4 $\frac{3}{4}$
RW 1	5

Size (hind)	Width (inches)
SP 3x0	4 $\frac{1}{4}$
SP 2x0	4 $\frac{9}{16}$
SP 0	4 $\frac{3}{4}$
SP 1	5 $\frac{1}{8}$
SP 2	5 $\frac{1}{4}$

Ortho-Kit 2.0

FOOT TOOLS

FOOT TOOLS

Hoof Nippers

GE Hoof Nippers

- ⌋ The premium hoof cutters for the professional
- ⌋ Made in the USA, the GE brand sets the standard for hoof nippers and other farrier hand tools

Available in:

- ⌋ Classic nippers - 14" and 15"
- ⌋ Easy nippers - 12, 14" and 15"
- ⌋ Easy Racetrack nippers - 14"

Nordic Forge 14" Nippers

- ⌋ Professional nippers featuring a wide 1" flat head and thin heat-treated jaw
- ⌋ Cushion-grip handles
- ⌋ Exceptional value

Viking 14" Hoof Nippers

- ⌋ A mid-priced reliable nipper for trimming hooves
- ⌋ Very sharp blades which make hoof trimming a breeze
- ⌋ Made in the USA

Jim Blurton Nippers

- ⌋ Made with stainless steel handles
- ⌋ H13 heads for additional durability
- ⌋ Perfectly balanced and comfortable in the hand

Available in lengths:

- ⌋ 14"
- ⌋ 15"

Mustad 14" Nippers

- U Precision machined and feature a hardened cutting edge to provide the best possible trim
- U The edge stays sharper due to specially designed stops which prevent the blades from meeting just before cutting
- U Rounded corners and strengthened jaw provide superior durability and a solid feel

Kahn Forge 15" Hoof Nippers

- U Polished, sharp and ready to work
- U A great purchase for both quality and affordability
- U Feature a smooth mechanism and cut efficiently and accurately

Diamond 15" Nippers

- U Cuts through horses hooves with ease. Provides great leverage and smooth cutting
- U Diamond is a traditional brand for mid quality farrier tools
- U Has a button rivet

Carl Spring Loaded Hoof Nippers

- U Stainless steel spring loaded nippers to make the job easier
- U These are ideal for one handed use - when trimming foals or when you need to hold the leg in one hand and trim with the other
- U The internal spring is hidden away inside the jaws to keep it clean and protected
- U External screw locks the nippers when not in use
- U Available in 12" and 14"

Half Round Hoof Nippers

GE 12" Half Round Nippers

- U Designed originally for use in hoof wall work and clip placement
- U This tool is excellent for getting to those hard-to-get-at places on the hoof

Jim Blurton 14" Half Round Nippers

- U For resections, cutting out clip holes and more
- U Stainless steel handles
- U H13 tool steel head - a premium nipper built to last

Nail Cutters

Kahn Forge 12" Nail Cutters

- U Polished finish, sharp and ready to cut
- U Features a sharp bite for cutting nails during clenching
- U Saves rasping and damage to your pull offs
- U Includes a magnet to easily collect and dispose of sharp nail ends safely

GE EZ Nail Cutters

- U Features overlapping blades that shear the nail off close to the hoof, leaving a flat top to the nail which does not need to be rasped (rather than a peak)
- U No guess work - cuts the nail to the perfect length every time

Knives

Jim Blurton Hoof Knives

Jim Blurton Drop Blade Knife

Effortless cutting and very sharp.

Jim Blurton Straight Blade Knife

Available in left or right handed options.

Jim Blurton Loop Knife

Ideal for the horse's frog and particularly effective on hard feet during the dry summer months.

Jim Blurton Abscess Loop Knife

Perfect for farriers and vets for accurate precision work such as removing abscesses and hoof wall resections.

Beanie Tools Hoof Knives

High grade hoof knives for farriers who expect quality. Unique ergonomic wooden handles for comfortable grip and easy cutting. The blades have been sharpened and coated with blue plastic for safer shipping. Made by multi-world champion farrier, Steven Beane, UK, these hoof knives are beautifully crafted and designed to help the farrier in their daily working life.

Beanie Tools Hoof Knife

- U Brass topper fitted on the end for burning on a hot shoe during shoeing
- U Curved blade
- U Right handed and left hand models
- U Blue-purple wooden handle

Beanie Large Loop Flick Knife

- U Featuring a hooked blade for picking out the hooves before trimming
- U The Beanie signature flick groover on the end is a handy tool for grooving under the clench when shoeing
- U Blue-purple wooden handle

Beanie Wide Blade Knife Green

- U Wide blade knife with a brass topper fitted at the reverse end for use when burning on
- U Green wooden handle

Beanie Abscess Loop Knife

- U Double sided which makes digging out abscesses easier
- U Can be used by either left or right hand
- U Natural wooden handle

Hall Hoof Knives

The Hall knife uses high carbon steel that is heat treated and tempered through a time consuming, exacting process. This is done to a level that provides the best edge retention and ease of sharpening. After treating and assembly, each blade is skillfully hand sharpened to provide a superior trim of the frog & sole of the foot.

Hall Loop Knife

Hall Abscess Knife

Available in large and small abscess loops.

Hall Drop Blade Knife

Available in right and left handed.

Maurer Forge Knives

- U Maurer Forge drop blade – a beautifully hand made hoof knife
- U Unique wooden handles crafted from a variety of American woods
- U Available in regular handle or thin handle option for those who like a tighter grip or have smaller hands
- U Available in right and left handed

Friedr. Dick Ascot Hoof Knife

- U The knife of choice for many experienced barefoot trimmers around the world. Perfect for professionals and those starting out with barefoot
- U High-quality special carbon steel with ergonomic rosewood handle
- U Available right or left-handed

Carl Hoof Knife

- U An affordable option for a very good every-day hoof knife
- U Curved blade
- U Available in right hand only

Chris Gregory Hoof Knives

- U The blade is a low-stain, high carbon steel that is hard enough to hold an edge, yet malleable enough to be sharpened to a razor edge in minutes
- U The Rooster Tail hoof pick at the end of the handle is designed to clean out the foot and be an aid for hot fitting
- U Available in:
 - U Long or short handle
 - U Left or right handed

Knife Sharpeners

Friedr. Dick Ascot 100mm Toeing Knife

- U Made in Germany from top quality materials
- U Trim frogs (particularly dried out and hard frogs), sole and hoof wall using a hammer
- U Full length including plastic handle is 280mm, length of blade 100mm
- U Height at cutting blade 30mm

Swiss Knife Sharpener

- U The knife sharpener preferred by many hoof-care professionals around the world because it really works!
- U Easy to use quality sharpener ideal for use on quality farrier knives and also scissors, household knives, fishing hooks and even tin openers
- U Made in Switzerland

Paul Mitchell Knife Sharpener

- U Premium Diamond sharpener for a perfect cutting edge
- U Double ended, with its tapered conical end (6mm - 1mm diameter) fitting the smallest of loops to the largest
- U Always use with oil

Save Edge Knife Sharpener

- U An industrial diamond grit sharpener for hoof knives
- U Features a broad blade and rounded corners to promote efficient sharpening
- U A popular choice for hoofcare professionals

Rasps

Save Edge Rasps

Save Edge Original 14" Rasp

- U Very popular hoof rasp
- U The rasp of choice for professional farriers
- U Manufactured with one rough side to rasp the bulk of the horn away and one smoother side to give a clean finish and remove rasp marks
- U Tanged end for fitting a rasp handle (handle not included)
- U Made in the USA

Save Edge 14" And 17" Beast Rasp

- U Extra wide compared to the regular Save Edge rasp
- U Fewer strokes when trimming the hoof
- U Easier to level the hoof
- U For farriers doing lots of trims, the Save Edge Beast Rasp is a labour saver

Save Edge 14" Final Touch

- U The specially designed teeth on both sides produce a show quality finish on the hoof

Save Edge Photo Finish rasp

- U The Save-Edge Photo Finish rasp combines the famous Save Edge 'rough' side with a smooth finishing rasp on the other

Bassoli Rasps

14" Italian made Bassoli rasps, available individually or in boxes of six. Their tangs fit all of our rasp handles.

Bassoli Farrier Rasp

- U Consistently sharp and durable
- U Has a rough cut side and a smoother side for finishing

Bassoli Black Farrier Rasp

- U Exceptional cutting ability
- U Designed with the busy farrier in mind. The rough side rivals competitor products to remove hoof wall with minimal effort while the smooth side gives a nice finish
- U Black coated to extend the life of the rasp and give a clog-free cut

Bassoli Blade Rasp

- U Has established a reputation amongst farriers worldwide and is the rasp of choice for many
- U Cuts through hoof with ease
- U Black coating helps reduce the teeth clogging up
- U One rough side and one smooth side

Bassoli Finishing Rasp

- U Designed for producing a perfectly smooth finish to the hoof wall, free from rasp marks
- U Both sides are engineered for the final finish as opposed to having one side dedicated to removing larger volumes of the hoof
- U Produces a show finish for show ponies or for presenting yearlings and young stock for the sales

Bassoli Costanza Rasp

- U 50mm wide for an easier flat finish on the hoof
- U The finishing side is slightly coarser than that on the Bassoli Blade

Bassoli Fifty Rasp

- U 50mm wide - 6mm wider than regular rasps
- U Features a standard coarse side and a super sharp file side that leaves a smooth finish

Bassoli Baby Rasp

- U Shorter in length than regular hoof rasps
- U Ideal for trimming minis, smaller ponies etc

Cody James Dymondback Rasp

An efficient, long lasting tool as an alternative to your rasp. It will not clog and gets approximately three times the number of horses done compared to a regular rasp. Replace the blade when needed, not the frame. Easy on the wrists, elbows and shoulders. Includes one frame and one blade. Available with medium and aggressive blades.

FOOT TOOLS

Heller Rasps

Heller Red Tang 14" Rasp

- ⌚ Especially well suited for rasping dry, hard hooves
- ⌚ Sharp file side allowing for easy removal of material with little effort

Heller Legend 14" Rasp

- ⌚ White tang rasp used by farriers
- ⌚ Has one rough side for removal of hoof wall and a smoother side for tidying up and removing rasp marks
- ⌚ Tanged for fitting rasp handle (handle not included)

Heller eXcel Rasp

- ⌚ Wider profile yet balanced and light
- ⌚ Improved leveling, efficiency and control due to a larger working surface
- ⌚ Extended coarse teeth to the edges for rasping in clips
- ⌚ Effective results in different conditions

Heller eXcel Legend 14" Green Tang Rasp

- ⌚ It's green, it's mean, it's a hoof rasping machine!
- ⌚ Sold individually or in boxes of 5 rasps

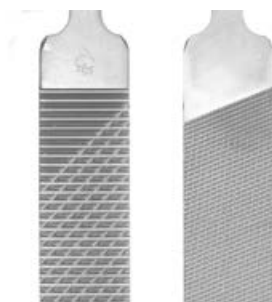

Other Rasps

Heller GR8AT White Tang 14" Rasp

- U 8 rows of teeth on the coarse side
- U An easier rasping experience whilst still offering a similar sharpness and cutting result to other Heller rasps
- U Each rasp has a cardboard sleeve to protect the teeth whilst the rasp is being stored or shipped
- U The tanged end fits any of our regular hoof rasp handles - either screw on or drive on
- U Sold individually or in a box of 5

Pferde 14" Hoof Plane

- U Pferde hoof plane - 14"
- U This isn't your normal hoof rasp
- U The innovative manufacturing process involves milling and hardening to make the hoof plane exceptionally long lasting compared to regular hoof rasps

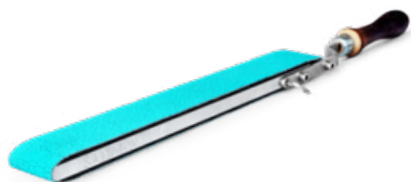

Rasp Covers

Leather Rasp Cover

- U Protective leather cover for 14" rasps
- U Keep your rasp clean and dry when it's not in use

Sanding Rasps

Beanie Tools Sanding Box

- U Beanie Tools Sanding Box unit for polishing metal shoes or horses' hooves
- U A quick-release system ideal for the farrier competitor
- U Aluminium body, stainless steel brackets, wooden handle and a quick-release pin for when changing the sanding belt

Hoof Buffer Attachment

Drill attachment. Makes the sanding of the hoof wall quick and easy to leave a smooth finish.

Comes complete with sanding attachment, bladder and 1 x 100 grit belt.

Bladders for Hoof Buffer Attachment

Replacement bladder fits inside hoof buffer attachment.

Replacement Belts for Hoof Buffer Attachment

Available in:

- U 60 grit, 80 grit and 100 grit

Clench Cutters and Buffers

Nordic Forge Clench Cutter/Buffer

An economical clench cutter for cutting or lifting the clenches away from the hoof during the shoe removal process.

Wire Brushes

Jim Blurton Elite Buffer

- For lifting clenches during the shoe removal process
- Colourful wooden handle

Nz Made Wire Brush

- New Zealand made wire brush with stainless steel bristles
- Ideal for in the tool box to clean off the feet/soles

Flat Soft Wire Brush

Ideal for using on the horse's hoof.

NZ Made Wire Brush with Arch Handle

Great for use on feet or hot shoes.

Heavy Duty Wire Brush

For use when shoemaking in the forge.

Pull-Offs

GE Pull-Offs

- U Top quality farrier pull-offs
- U For pulling off shoes during the shoeing process
- U Made in the USA by GE Forge & Tool
- U Available in 14" Classic, 12" Easy, and 14" Easy

Diamond 12" Pull-Offs

Has an exclusive pattern with sharp teeth on outside edges for ease in spreading most shoe sizes and styles.

Nordic Forge Pull-Offs

Made in USA and represents exceptional value for money.

Nail Pullers

Mustad 14" Pull-Offs

Made of good quality steel for durability and sharpness for safe, efficient removal of shoes.

GE Crease Nail Pullers

Made in the USA, these nail pullers from GE are a premium product for the professional farrier.

Mustad Crease Nail Pullers

- Mid-quality nail pullers that give a good grip
- Used to pull nails out of shoe before removing shoe
- Blackened steel finish

Kahn Forge Crease Nail Pullers

- 12 inches in length
- A mid priced polished farrier tool
- Fits snugly inside the crease/groove of the horseshoe so you can grab two sides of a horseshoe nail. With a little gentle leverage the nail can be loosened in the shoe and then pulled out. This method allows a single nail to be removed from the shoe without necessarily removing the shoe away from the hoof

Nailing-On Hammers

Flatland Forge Nailing-On Hammer

Quality nailing-on hammer with wooden handle from Jim and Kathleen Poor, USA.

- U Available in 8 oz, 10 oz, 12 oz and 14 oz weights

Cavalry Nailing-On Hammer

With an octagon shaped face, the NC Tool Cavalry hammer is perfectly balanced. Slim handle for smooth strokes with little or no vibration.

- U Made with the finest tool steel in the USA
- U Available in 12oz weight

Jim Blurton nailing-on hammer with wooden handle.

- U Precision nailing for the professional farrier
- U Available in 12oz and 14oz

Diamond Nailing-On Hammer

A great affordable hammer for every day use when nailing on.

- U Available in 10oz weight

Hammer Handles

Nordic 10oz Nailing-On Hammer

Exceptional value for a standard quality farrier hammer. Made in the USA.

Cavalry Nailing-On Hammer Handle

Replacement handle for the Cavalry 12 oz. farrier nailing on hammer.

Hammer handle broken?

We can supply replacement hammer handles for most brands.

Clenchers

Kahn Forge Curved Jaw Clenchers

- U 13.5 inches in length
- U Folds the nail tip down into the hoof wall during the shoeing process
- U A mid-priced tool for clenching

Diamond 12" Saddle Horse Clenchers

- U A simple style of clencher
- U Economical tool for occasional use

Diamond 12" Farrier Clenchers

- U An aggressive style of clencher
- U Serrated ball pulls nails down and into the hoof
- U Flat bottom jaw

Diamond 12" Gooseneck Clenchers

- U The Diamond Gooseneck clencher turns down and clenches heads of smaller nails while shoeing
- U Made from durable high quality steel
- U Fastened together with a button rivet

Ge Curved Jaw Clenchers

- Used for clenching the nail into the hoof wall
- GE tools set the standard for farrier hand tools worldwide - made in the USA

Ge Low Nail Clenchers

Low nail curved jaw - with shorter reins particularly suitable for racehorses and/or low nails.

Mustad Standard Clenchers

A well-balanced clencher with a comfort grip appropriate for a variety of nailing heights

Clenching Blocks/Groovers

Vft Clenching Block

- U The Viking Farrier clenching block is designed to fit the hand comfortably
- U Lightweight and does not conduct cold in the hand on chilly days
- U The hardened steel insert is replaceable

NC Clench Block

- U Used for clenching and seating nails
- U Made of solid steel

Measurements:

- U Height - 2"
- U Depth - 1 1/2"
- U Length - 4 3/4"

Mustad Double-Ended Clench Groover

- U Removes a small amount of hoof under the nail for the clench to sit snugly in the hoof rather than on top
- U Double ended so it can be used left or right handed

Other Hoof Tools

Hoof Testers

- U Stainless steel hoof testers as used by vets, farriers and other professionals
- U Used to identify and locate abscesses, infections and stone bruises or pinpoint soreness in the hoof

F. Dick Hoof Pick

- U Ergonomically designed hoof pick
- U Made in Germany from the finest materials
- U Strong and durable with rubber handle for comfort

Jim Blurton Hot Fitting Tongs

- U Tapered ends shaped like a nail head to ensure a tight hold on the shoe
- U Designed to carry the hot shoe to the foot
- U Allows you to apply an even pressure to the shoe when fitting

Combo Tool

- U A three-in-one tool
- U Ideal for those emergencies when you need to quickly take off a loose shoe or nail one back on
- U Easily pull apart the combo tool to give you a nailing hammer and clench cutter then snap the tool back together for pull-offs

Tool Boxes

Thoro'Bred Large Tool Box

- U Aluminium design
- U Bottom tray that lifts up for safe storage
- U Lots of space for lots of tools

Hoof Stands

Hoofjack

Hoofjack is designed to support the horse's foot through all phases of shoeing, trimming, treatment and daily care. Hoofjack provides a stable support for the horse to rest its foot on, allowing the horse to feel comfortable, secure and relaxed.

The Hoofjack base has two magnets for holding tools and nails and comes with one standard cradle, and one straight post with standard rubber cap. Free 40 minute Hoofjack instructional video included.

Trim and rasp without putting the hoof between your knees or supporting the horse with your body. Take your mind off your back and knees and put it back into your work.

Available in green, pink, red or purple.

Standard Hoofjack

- U Accommodates a pony up to a small draft or draft cross
- U The standard base is 12" in height and has a base diameter of 18"
- U Overall height adjustment is 14" - 22"

Medium Hoofjack

- U Has the same base diameter as the Standard Hoofjack but is 3" shorter
- U The medium Hoofjack can be used in place of the standard Hoofjack or it is ideal for small ponies, horses with limited range of motion or for users under 5'10" wanting to use Hoofjack for the front feet
- U The medium base is 9" in height and has a base diameter of 18"
- U Overall height adjustment is 11" - 19"

Mini Hoofjack

- U Shorter and narrower than the standard Hoofjack. The mini base is 7" in height with a base diameter of 13"
- U Overall height adjustment is 8" - 12"

Geriatric Hoofjack

- U Intended for horses with severely limited range of motion that would normally require you to work off the toe of your boot
- U Utilises a mini base which is 7" in height with a base diameter of 13"
- U Overall height adjustment is 8" - 13"

Draft Hoofjack

- U For use on larger hooves
- U Includes a larger hoof cradle
- U The standard base is made of linear polyethylene which is 12" in height and has a base diameter of 18"
- U Overall height adjustment is 14" - 22"

Combo Hoofjack

- U Consists of one standard base, one standard cradle, one standard straight post, one draft cradle and one draft straight post, making it ideal for people with small ponies through to large draft horses

Check out our huge range

of farrier products – online, in store, or by phone.

Measuring

Jim Blurton Brass Rule

- U Polished brass rule
- U A fold out rule with both inches and mm
- U 24" and 610mm long

Jim Blurton T-Square

- U Polished stainless steel t-square
- U A handy tool for assessing the balance of the foot in relation to the long axis (limb)

Kowhai Forge Golden Mean Dividers

- U Measure ratios of the hoof
- U Polished stainless steel
- U Slide out native hardwood case

Proportional Hoof Balance Tool

- U Measure the Golden ratio of 1:1.618
- U Stainless steel
- U Information sheet included

FORGING TOOLS

Forging Hammers

Jim Blurton ARS Sledge Hammer

Designed by Andy Reader-Smith and made by Jim Blurton, this sledge hammer has a weighted head featuring the silver fern logo as a nod to the home country of the designer.

Jim Blurton Turning Hammer

Jim Blurton shoe turning hammer for the professional farrier.

Available in:

- 2 lb
- 2.5 lb

Derek Gardner Shoe Turning Hammer

Twice winner of the UK nationals, Derek Gardner is one of the world's top farriers. His stylish and practical range of tools are finished and inspected by Derek himself and highly sought after by farriers on both sides of the globe.

This well balanced shoe turning hammer is available in 1 3/4 lb, 2lb and 2 1/2 lb.

Beanie Forging Hammer

- Beanie forging hammer from multiple world champion blacksmith Steven Beane, UK
- A forging hammer ideal for every day shoeing and also forging horseshoes
- Available in 1 3/4lb, 2lb and 2 1/4lb

Fullers

Mustad Fuller

- U Hardened for durability to minimize the risk of splitting
- U Available in E-head and City head

Derek Gardner Hunter Fuller

Derek Gardner hunter fuller with wooden handle.

Derek Gardner Guide Fuller

- U Wooden handle
- U Can be used with the hunter fuller

Stamps

Jim Blurton E Head Stamp

- U Jim Blurton E-head stamp with handle
- U For punching nail holes during shoe-making for the reception of E head horseshoe nails

Jim Blurton City Head Stamp

- U Blurton City Head (CH) stamp for punching nail holes during the horseshoe-making process
- U Replaceable wooden handle

Pritchels

Jim Blurton E-Head Pritchel

Made from quality tool steel for the professional farrier.

Jim Blurton Back Pritchel

Back pritchel for clearing the nail holes.

Stud Punches

Jim Blurton Carry Pritchel

For carrying shoe to the foot whilst hot fitting.

Jim Blurton 3/8" Stud Punch

Jim Blurton 3/8" stud punch for the professional farrier.

Derek Gardner 3/8" Stud Punch

The Derek Gardner handheld stud punch feels very comfortable in your hand and is set up perfectly for punching 3/8" stud holes.

Derek Gardner 3/8" Stud Punch with Wooden Handle

3/8" stud punch with comfortable wooden handle.

Taps

Tap Wrench

Tap wrench handle for holding the engineers tap while cutting the threads in stud holes.

3/8" Engineer Tap

- U 3/8" middle tap
- U For cutting stud hole threads in shoes
- U 3/8" is the NZ standard for stud holes

Bassoli 3 in 1 Stud Hole Drill Bit

- U Efficiently drills, taps and countersinks for stud holes
- U Holes (6mm) should be pre-drilled
- U Reverse drilling to avoid breaking the bit is recommended
- U 3/8" stud hole

Fire Tongs

Jim Blurton Snakehead Tongs

Quality forging tongs with a unique snakehead design.

Available in:

- U 6mm (1/4")
- U 8mm (5/16")
- U 10mm (3/8")
- U 11mm (7/16")
- U 12mm (1/2")

NC Tool Co Tongs

Available in:

- U 1/4"
- U 5/16"
- U 3/8"
- U 1/2"

Quick and Dirty V Bolt Tongs

- U A useful pair of tongs for any blacksmith or farrier
- U Made from 1045 steel
- U 18" length from one end to the other
- U Available to hold various sizes of steel

Other Forge Tools

Derek Gardner Forepunch

Derek Gardner E-head hunter forepunch (stamp) with wooden handle.

Derek Gardner Bob Punch

- U A hand-held tool for starting the bubble when pulling a clip on horseshoes during shoe-making
- U Made from S1 tool steel

Jim Blurton Clipping Punch

For clipping up shoes - also known as a bob punch. For the professional farrier who demands quality tools.

VFT Tool Maintenance Compound

A tool maintenance compound designed to maintain and maximize your tools' performance.

Flux

Iron Mountain Forge Welding Flux

Iron Mountain welding flux - the preferred choice of blacksmiths and farriers.

Sureweld Welding Flux

To assist with fire-welding in the forge.

Anvils

Yoder Stall Jack

- U Portable and ideal for the mobile farrier
- U Available in small (50cm high) and medium (55cm high)

O'Dwyer 40kg Anvil

- U Suitable for the back of the truck
- U Turning cams and beak suitable for shaping a range of horseshoes
- U Other weights available on request

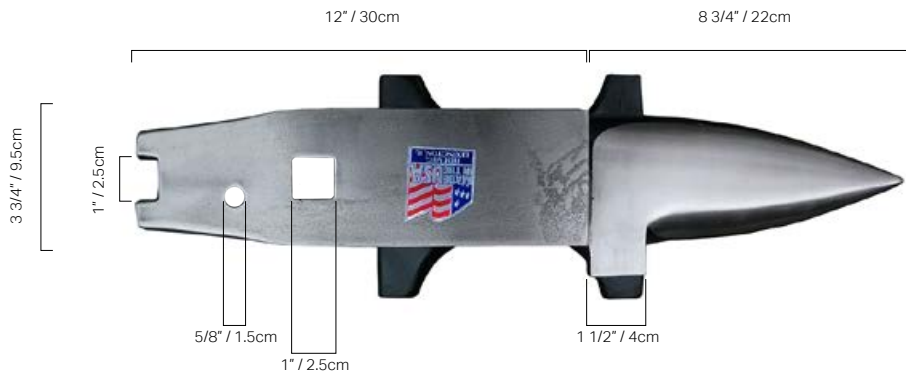

JHM 70lb Anvil

Made of ductile iron, machined and heat treated in the USA.

This 70lb (31.75kg) anvil is one of the highest quality anvils you can buy. It is a good weight for the back of the truck for a mobile farrier, but also suitable for the workshop. The anvil has a 3" tapered heel and turning cams for bending steel.

Dimensions below:

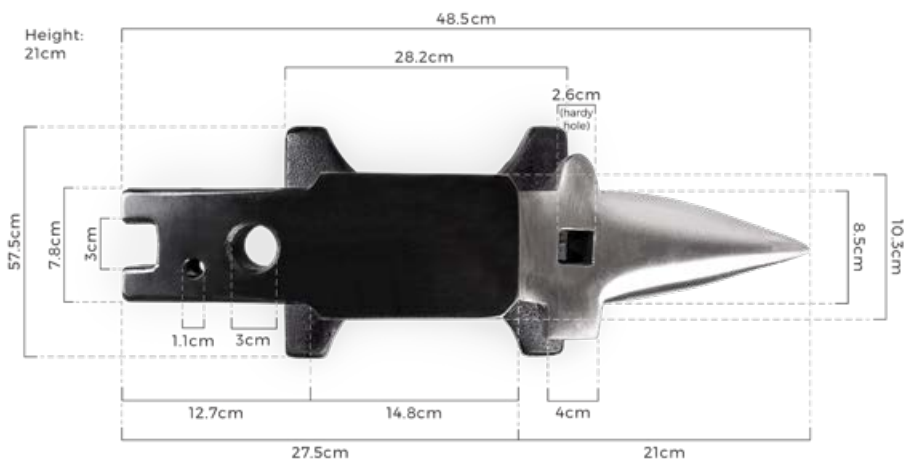

NC Tool Co Big Face Anvil

- 3 ¾" wide face great for leveling shoes
- Turning cams
- Opposing square & round cliphorns for making great clips and square toes. Also convenient for left handed shoers
- Thin heel design
- 1-1/4" chamfered, round turning hole in heel
- 1" hardie hole in horn
- Pritchel hole in heel

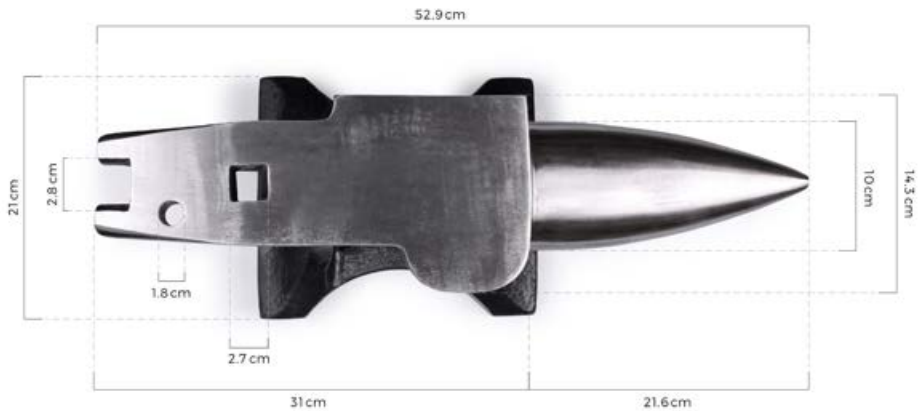

Weight	70lbs/31.8kg
Face	3 ¾" x 6"
Heel	3 ¼" x 5"
Horn	3 ½" x 8"
Height	8 ¾"
Base	11" x 9"

Centurion Anvil

- U 38kg farrier anvil
- U Turning cams on the hanging anvil
- U Wide face
- U Clipping table for pulling clips
- U Made of high tensile steel
- U Suitable for the forge or the truck

Anvil Stands

NC Folding Anvil Stand

- U Folds down to 7" (17.8cm) high in seconds, so it is easy to transport and handle
- U Made from strong tubular steel
- U Spring loaded vice on one side for holding shoes for rasping etc
- U Anvils are firmly secured using a hand crank lock down method. It can be adjusted to fit a variety of anvils

FORGING TOOLS

Forges

Blacksmith Forge

- ⌚ Ideal for making horseshoes or general blacksmithing
- ⌚ Well built solid forge complete with electric fan blower, water cooled tue iron etc
- ⌚ Plugs into a standard NZ power socket
- ⌚ 660mm wide x 840mm deep x 1080 tall
- ⌚ Working height 800mm
- ⌚ Weighs approximately 80kg

Swan Single Burner Gas Forge

- ⌚ Very popular general purpose forge used by UK farriers
- ⌚ Front or rear exhaust options
- ⌚ Proven reliability and economy

Whisper Baby Forge

- ⌚ Very portable single-burner forge with rear door to allow heating of long stock
- ⌚ Small forge for smaller shoes
- ⌚ Made in the USA

Whisper Momma Forge

- ⌚ Open end model - it has open ports on the side which is ideal for heating steel bars etc
- ⌚ Double burner with front door
- ⌚ Spark lighter
- ⌚ Made in the USA by NC Tool

Pro Forge PF200 Gas Forge

- U Double burner portable farrier forge
- U This forge is efficient, portable and ideal for the travelling farrier
- U Port on one side for heating bars
- U Made in USA by Cliff Carroll

Knifemaker Forge

- U A double-burner farrier forge that allows for forging blades or damascus
- U Insulated doors on both ends for easy entry and removal of damascus billets, and allows for long pieces to be forged

Whisper Benny Forge

- U 2 burner horse-shoer's gas forge
- U For fitting machine made shoes
- U Small exhaust port improves fuel consumption

Whisper Lowboy Forge

- U A low profile three-burner farrier forge that is ideal for competition shoe making or forging damascus blades
- U Has an insulated door and open bar stock ports at each end

Whisper Daddy Forge

- U 3 burner blacksmith's gas forge
- U Large firebox great for art objects, knifemaking and more
- U Open end ports for passing long bars through

Forge Parts

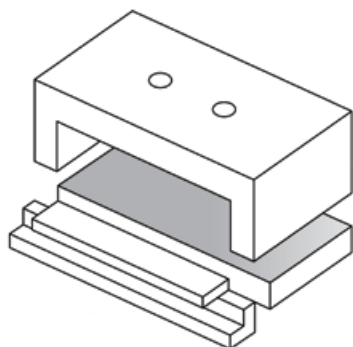

NC Tool Swing Out Arms

Swing out arm mounts for Whisper Low Boy, Whisper Daddy, Whisper Momma, and Deluxe forges.

Pro Forge PF200 Swing Out Arm

Swing out arm mount for Pro Forge PF200.

Re-Liner Kits for NC Tool Forges

- U Reliner kits for various NC forges
- U Rebuild your forge if the liner is damaged or worn out

Re-Liner Kit for the Pro Forge PF200

Kit includes:

- U Forge
- U Door liner
- U Gasket
- U Fire bricks

Kaowool Forge Liner Blanket and Board

- U A ceramic fibre material used in the lining of forges and other high temperature applications
- U Suitable for continuous temperatures of 1260 degrees celsius
- U Sold by the metre (600mm wide and 25mm thick)
- U Kaowool board available by special request

NC Tool Fire Brick

- U Fire bricks for the base of gas forges
- U Can be used to replace damaged fire bricks or on top of existing base bricks to avoid damage when fire-welding etc

Blacksmith Coke

- ⌋ Coke for use in fixed blacksmith coke forges
- ⌋ 1000kg minimum order
- ⌋ This is a special order item from the UK

Spare parts and rebuild kits

We supply spare parts and rebuild kits for most forges. Please ask us!

Vices

Valley Gooseneck Vice

- ⌋ Unique design of the vice jaw, together with a twist closure, gives the firmest hold possible
- ⌋ This vice is cast from chrome-moly steel and professionally heat-treated for strength and durability
- ⌋ Ideal for truck mounting or in the workshop

HOOF CARE

Hoof Adhesives and Applicators

Equimix Adhesives

Equimix adhesives come in two-part 178ml tubes. They can be used with an existing 180cc/160cc Vettec style gun and mixing tips. A great cost-effective option.

Equimix Hoof Pad

- U Designed to squirt on the horse's sole during the shoeing process to form an instant pad which bonds directly to the sole
- U Offers the horse some shock absorption and comfort
- U Must be used with mesh or pour pads

Equimix Hoof Pad CS

- U The same formula as Equimix Hoof Pad but with added CS (copper sulphate)
- U The CS pad material is infused with tiny copper sulphate crystals to ensure the frog and sole remains healthy whilst the pad is in place

Equimix Hoof Pad Comfort

- U The same formula as Equimix Hoof Pad but results in a softer, more comfortable pad

Equimix Ultra Fast Hoof Bond & Repair

- U A fast setting bond and repair material which is ideal for repairing cracks, creating foal extensions, direct glueing of horseshoes and more
- U The fast setting glue has an initial set time of around 35 seconds which makes it ideal when you need to get the glue setting quickly (for foals, nervous or fidgety horses etc). Full and final set occurs in around 5 minutes depending on temperature

Vettec

Vettec Equi-Pak 160cc

Dispensed directly onto the sole and frog, Equi-Pak is a liquid urethane that sets in 25 seconds.

- ⌚ Can be used with or without a pad
- ⌚ Provides support and protection for thin soled, flat footed horses, absorbs shock
- ⌚ Can be filled to ground level for added support in less than one minute
- ⌚ No hand mixing, no waste
- ⌚ Will not breakdown, impervious to debris and moisture
- ⌚ Sole and frog left in great condition

Vettec Equi-Pak Soft 160cc

- ⌚ About 2X softer than regular Equi-Pak
- ⌚ Stays soft (even in cold temperatures)
- ⌚ Strong bond to soles sealing out moisture and debris (better than silicones)
- ⌚ Use with pads on working horses
- ⌚ Perfect for deep commissures and thin soles
- ⌚ Can be filled to ground level (w/o a pad) for lameness cases (with limited turnout)
- ⌚ Absorbs shock and concussion

Vettec Equi-Pak CS 160cc

Infused with copper sulphate, Equi-Pak CS effectively treats most minor cases of thrush.

- ⌚ Can be used as a preventative measure during wet seasons
- ⌚ Eliminates the need to pick out the feet and apply daily medication
- ⌚ Sets in less than 1 minute
- ⌚ Allows for faster, thicker hoofwall and sole growth
- ⌚ Provides same protection and support as original Equi-Pak

Vettec Adhere 160cc

Adhere is a fast-setting urethane adhesive designed to bond aluminum or steel shoes to the hoof and to fabricate hoof wall repairs.

- ⌚ Glue on steel, aluminum and most plastic shoes as well as any hoof repair project
- ⌚ Initial set time of one minute and final cure time of six minutes
- ⌚ Sets hard with a superior bond, but maintains the flexibility necessary at the quarters and heels to allow the natural movement of the hoof
- ⌚ Available in black and beige

Vettec Sole-Guard 160cc

- Offers fast and effective protection and support for the unshod foot
- Sole Guard is used to fill the bottom of the foot, creating a protective coating that bonds to the foot for up to three weeks
- Sole-Guard sets firm to protect the unshod foot, but retains flexibility to move naturally with the foot, providing comfort and support

Vettec SuperFast 160cc

30-second set, all-in-one hoof adhesive.

- Making foal extensions is easy
- Create a custom shoe in minutes
- Hoof repairs completed in minutes

Vettec mixing guns and tools

Vettec Dispensing Gun

Dispensing gun which is required for all Vettec 160cc products.

Vettec Battery Powered Dispensing Gun

Battery powered dispensing gun for Vettec 160cc products.

Easy to use, quiet and needs fewer hands to operate compared to regular hand guns.

Supplied with two batteries.

Vettec Large Mixing Tips

Large mixing tips for Vettec 160cc products.

Vettec Equi-Mesh

Support Mesh for packing material, black (6" x 8").

Roll out between the shoe and the hoof before applying EquiPak products.

Blue Foam Board

- U Easy to apply
- U Seals and supports Equi-Pak until set
- U Recesses material from ground level for traction
- U Evenly distributes material over solar surface
- U No material ends up as a "high" point to create sole pressure
- U Reduces the time spent holding the hoof up
- U Easy to remove

Contouring Plastic for Sole Guard

Translucent lightweight plastic material that can be utilised to push the product into the voids. Particularly useful when applying Sole Guard.

- U Used after applying Vettec products to smooth and level the material
- U Will not stick to Vettec products and can be discarded after use

Equilox

Equilox Adhesive System

Equilox is an extremely strong resin that can be used for anything from repairing small quarter cracks to reconstructing an entire hoof wall, yet flexible enough for easy filing, shaping, and even nailing.

- U Comes in: single use 1oz (28.5ml) pots, 150ml (5oz) stubbies, and 400ml (14 oz) tubes
- U Set time: Sets in 6 - 8 minutes, final cure in 10 - 13 minutes at 21° C (70° F)
- U Shelf life: At least 6 months from fill date (as stated on label) — or longer if refrigerated
- U Available in black or tan
- U We also stock mixing guns in regular and mini size for applying Equilox, as well as mixing tips and applicator sticks

400ml (14oz)
Side-by-Side Gold

Stubbie 150ml (5oz)

Single use pot

Equilox Mixing Guns and Tools

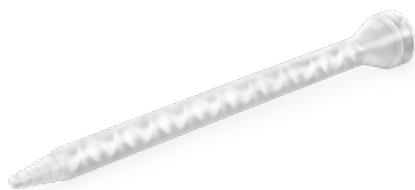

Equilox 400ml Dispensing Gun

- U Equilox Side-by-Side (Gold) applicator gun
- U Fits Equilox 400ml (14oz) cartridges

Equilox Large Mixing Tips

- U Large mixing tips for Equilox 400ml (14oz) and Stubbie 150ml (5oz) cartridges

Equilox Stubbie Mixing Tips

- U For use with Equilox Stubbie 150ml

HOOF CARE

Other Adhesives

Hoof-Life

- U Modern adhesive designed to withstand the rigours of competition horses as well as assisting in hoof rebuilding
- U 4 - 6 minutes curing time
- U Available in 420ml cartridges
- U Mixing tips sold separately

Silicone and Applicators

Vettec Sil-Pak 160cc

Dispense under a pad to cushion, seal and protect the equine foot.

- U Weight bearing in 2 minutes
- U Totally fills and seals all void areas
- U Auto-mixing ensures consistent set times
- U Ensures complete coverage of sole
- U Prevents debris migration
- U Use Vettec 160cc mixing gun and tips
- U Economical application

MV2

MV2 Silicone System

A range of 200ml silicones for use under hoof pads for a variety of uses.

Ultra Soft (10 shore A) - recommended for highly sensitive soles.

Enduro (12 shore A) - soft silicone that has four times the mechanical resistance compared to the Ultra Soft. Injected under the pad, the material stays in place and holds its position even under extreme conditions. Ideal for endurance horses and those working on hard or irregular ground.

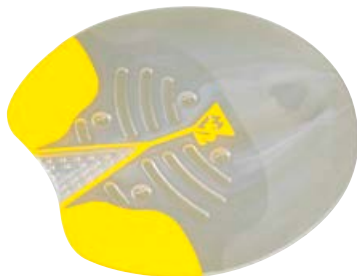

Comfort & Shock Absorbing (18 shore A) - as the name suggests, enables a shock absorbing cushion under the pad for optimal load distribution to reduce concussion. Ideal for sore horses.

Firm Kinesitherapeutic (25 shore A) - providing kinesitherapeutic support to the sole to help with under-slung heels and to assist with growth of heel.

Hard Kinesitherapeutic (50 shore A) - extra hardness for use on laminitic equines and remedial cases.

HOOF CARE

MV2 Dynamic Pads

- U A bi-density hoof pad with shock absorbing properties on the heel
- U Combines special non-return valves in the pad for the injection of MV2 silicones (using the MV2 mixing tips)
- U Transparent pad so you can see silicone packing injected under the pad
- U Fill different zones of the foot with several hardnesses of silicone as required

MV2 Dispensing Gun

- U Dispensing gun for MV2 silicone system

MV2 Mixing Tips

- U Mixing tips for use with the MV2 silicone system

Hoof Staples

Pack of 10 steel hoof staples for outer hoof wall crack repair.

Available in sizes:

- U 3/16" (5mm)
- U 1/4" (6mm)
- U 5/16" (8mm)

Hoof Repair Fabric

For use with acrylic and adhesives when repairing hooves. 12" in length.

These fabric materials can be cut into shape and used to add strength to a hoof repair when using glues.

Available in three types:

- U Polyester - high strength braid (1 1/2" tube)
- U Cobrasox - ultra high strength braid (carbon fibre/kevlar) (1 1/2" tube)
- U Poly-Vectran - abrasion resistant, high strength braid (polyester/liquid crystal polymer) (4" wide tape)

Hoof Crack Sutures

- U Suture kit for repairing cracks in the hoof wall
- U Kit contains 8 stainless steel sutures with backing plates, pre-threaded and 8 extra stainless steel backing plates

Farrier Shears

High carbon steel, Rockwell 72 degrees, hard chromed with high leverage grips and short powerful serrated jaws.

Ideal for cutting hoof repair fabric.

Aluminium Crack Plate

Ideal for glueing or screwing onto the hoof wall to assist with the repair of difficult cracks.

- U 3 1/4" x 2" (83mm x 50mm)
- U Glue and screws not included

Hoofcast

Hoofcast is a versatile hoof cast system which is simple to apply yet very effective.

Applied in a similar way as you would apply a regular hoof bandage, Hoofcast sets hard within minutes with the finished result similar to a cast applied to human broken bones.

Hoofcast can be applied within minutes by vets, farriers or horse owners for:

- U Adding a temporary hoof dressing for foot injuries
- U Providing comfort to tender footed horses (or those transitioning to barefoot)
- U Support to the hoof wall in laminitic and founder cases
- U The repair of poor or damaged hoof wall
- U To keep a loose shoe in place in an emergency
- U Temporary protection to the hoof when a shoe is lost
- U Hoofcast can be used on a barefoot horse, under a shoe (the farrier can nail through it) or over a shoe to help hold the shoe in place

One roll per hoof is required and available in:

- U 2" (50mm) wide
- U 3" (75mm) wide
- U 4" (100mm) wide

Hoof Screws

Set of 40 small screws for screwing hoof repair plates, patches or other crack repair devices to the outer hoof wall.

Mixed sizes and head types.

Michael Puhl Hoof Clip

For repairing cracks, the regular PM Hoof Clip has a mechanism that can be tightened or expanded for maximum control of crack stability levels.

The stainless steel clip comes complete with 2 attachment screws and wrench for adjusting the tightness of the clip.

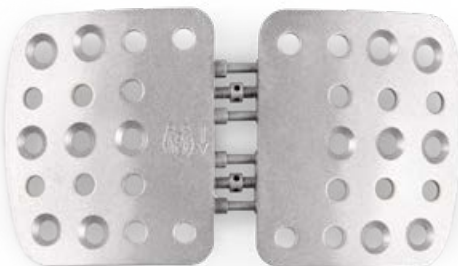

Regular hoof clip

Heel hoof clip

Butterfly hoof clip

Toe hoof clip

Hoof Packing

EquiFlex-Pak

- U The SoundHorse 2-part silicone packing is specifically designed for the rigors of hoof packing application and is "gas permeable". This unique property allows treatment materials (e.g. copper sulphate) when mixed with the silicone to slowly pass through the cured silicone as a treatment
- U Two-part silicone, 1:1 mix ratio with a quick set time
- U 3lb (1.36kg) boxed kit

Michael Puhl Hoof Packing

PM Hoof Packings are high-tech two-component silicones that are easy and clean to work with (you do not need gloves). Compared to many other hoof packings on the market the PM hoof packings do not stick to hoof and pad and do not hamper the foot's natural function and balance in locomotion.

Available in regular and soft. The PM Hoof Packing Soft is soft, lightweight and shock absorbing, ideal for feet that are sensitive to sole pressure.

Extremely lightweight and particularly shock-absorbing 'high tech' A+B component kneading silicone. Mixture ratio 50:50, curing time: 2-3 mins.

Particularly appropriate for coffin joint inflammation and generally sensitive hoof sole, for navicular syndrome, corium inflammation, diseases of the deep digital flexor tendon, contracted and under-run heels, coffin joint arthritis, laminitis/founder and hoof cracks.

The PM Hoof Packing Soft has also been tried and tested in combination with hoof boots as an additional insole. It ensures that the boot fits perfectly with optimal shock absorbance and pressure distribution.

MP Soft available in:

- U A+B 0.7kg and 1.4kg

MP Regular available in:

- U 1.5kg

Hoof Pads

Black Rubber Hoof Pads

- Provides cushioning and protection
- One size fits all - cut to size with your hoof nippers or a sharp knife
- 6" wide x 6 1/2" long
- Sold by the pair

Castle Plastics Mesh Pour Pads

Firm plastic mesh pads for use with liquid hoof packing materials.

Size: 6" wide x 6 1/2" long.

Castle Oval Wedge Pads

Urethane wedge pads available in 1, 2 and 3 degree wedges.

Size: 6" x 7".

Castle Frog Support Pads

Hoof pad with raised frog piece to apply pressure to the frog.

Available in:

- Flat
- Wedge

Available in sizes:

- Small
- Large

HOOF CARE

Michael Puhl Flat Pads

The PM flat pad is an aid to eliminate increased strain on tendons, heels and soles.

To restore the hoof-balance by pressure distribution.

Tendon-supporting effect due to frog-shaped concavity – leading to a statics/balance improvement similar to the one of a closed-bar shoe (e.g. egg-bar shoe). The empty space between hoof and the PM Hoof Pad Flat can then be filled with PM Hoof Packing, Regular or Soft.

Size	Width	Length	Thickness
One size	180mm	183mm	3mm

Michael Puhl Wedge Pads

To restore the hoof-balance by enlarging the weight bearing area.

Tendon-supporting effect with frog-shaped concavity. An extra benefit of the PM wedge pad is the enlargement of the weight bearing area of the heels that results in an optimized weight and pressure distribution. By lowering the heels, the weight-bearing area is substantially increased.

Available in medium and large sizes and can be cut to shape.

Size	Width	Length	Thickness
Medium	145mm	150mm	9mm
Large	180mm	185mm	10mm

Follow us on Instagram to see photos of our latest products!

VFT Supreme Pads

Viking Farrier Tools' revolutionary Supreme hoof pads provide support, protection, shock absorption and comfort.

The pads have a concave sole which allows for some grip when the horse is working on soft surfaces, and the frog support allows the pads to flex over the frog whilst offering support.

All pads have one way silicone application ports in the ground surface. Most common cartridge based silicones and liquid hoof padding materials (Vetec EquiPak, MV2 etc) can be applied once the pad is in place on the foot.

Available in:

- U 30 shore (blue) is the softest pad in this range
- U 50 shore (green) is medium rated
- U 70 shore (orange) is the firmest of the types

Comes in two sizes:

- U Regular (135mm)
- U Large (165mm)

HOOF CARE

Shocktamer Pads

Shocktamer horse hoof pads feature a dual density polyurethane which allows the pad to both absorb and dissipate concussion.

The grey material is raised slightly above the black and absorbs concussion, while the harder black material dissipates it away from the hoof and the leg.

Available in:

- U Medium: 150mm x 140mm, 4mm thick

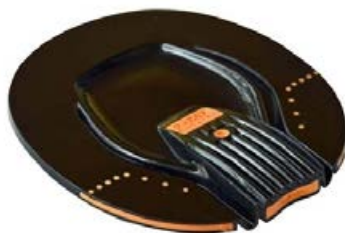

TTM Frog Support Pads

A high quality pad with added frog support.

Available in:

- U Flat small: 4 3/4" x 5"
- U Flat medium: 5 1/2" x 5 7/8"
- U Flat large: 6 1/4" x 6 1/2"
- U Wedge medium: 5 1/2" x 5 7/8"
- U Wedge large: 6 1/4" x 6 1/2"

Razer ProPad

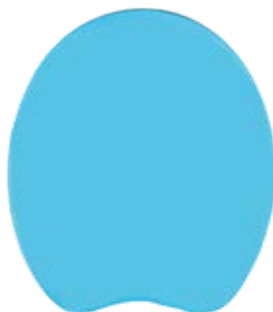

The Razer ProPad has been designed with a flexible frog-support to fill the void between hoof frog and ground when the horse is shod.

ProPad can reduce injuries and increase performance.

Can be used with the Razer horseshoes or with other brands of shoe.

Available in:

- U Support small: 4 7/8" x 5 3/8"
- U Support medium: 5 1/2" x 5 7/8"
- U Soft Support small: 4 7/8" x 5 3/8"
- U Soft Support medium: 5 1/2" x 5 7/8"
- U Soft Support large: 6" x 6 3/8"

Kerckhaert Blue Race Pads

Size: 6" x 6 1/2".

Luwex Flat Pads

Made from a proven shock absorbing material.

The integrated mesh is great for applying hoof packing materials (EquiPak etc).

Available in:

- U Flat: 6 1/2" x 6 1/2"
- U 2 degree wedge: 6 1/2" x 6 1/2"

Hospital Open-Up Pad

This hospital pad is made from a hi-tech material and has a cap (to enable cleaning and medication of the wound) that can be fixed and removed with the special key provided.

Size: 7 1/4" x 8 1/4".

Castle Draft Horse XXXL Pads

For the larger horse.

Size: 9 3/4" wide x 9 3/4" long, 5/16" thick.

Keystone Leather Pads

Leather conforms naturally to the hoof and allows breathability for the hoof sole while maximising protection.

Available in:

- U Light
- U Regular
- U Heavy

HOOF CARE

DePlano Leather Pads

Premium Italian leather hoof pads. Allow for some breathing of the foot without compromising on protection and shock absorption. Measure 170mm x 190mm.

Available in the following thicknesses:

- U Light: 3 to 3.5mm
- U Regular: 4 to 4.5mm

Thermo Pads Race & Sport

When heated, thermo pads become mouldable to follow the contours of the sole and frog providing protection, support and comfort.

Available in:

- U Sport (blue): 14 x 14cm
- U Sport (blue): 20 x 20cm
- U Race (white): 14 x 14cm
- U Race (white): 20 x 20cm

Flip Flop Pads

For the harness racing horse with sore knees.

Open eye design makes it easier to clean under the pad when it is on the foot.

Available in 5 sizes:

- U 1 (4 5/8" x 5 1/4" wide)
- U 2 (5" x 5 3/4" wide)
- U 3 (5 1/4" x 6" wide)
- U 4 (5 3/4" x 6 1/2" wide)
- U 5 (6" x 7" wide)

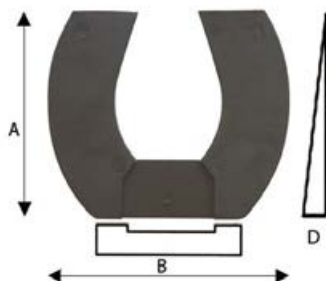

Flapper Race Pads

Open centre flip flop pads for harness race horses. Lighter in weight than the full flappers.

The open centre allows for dirt and debris to exit the sole compared to a full pad which can trap dirt underneath.

Available in 3 sizes:

- U 2 (5" wide)
- U 3 (5 1/4" wide)
- U 4 (5 3/4" wide)

Plastic Heel Wedges

Used for raising the heel.

Available in:

- U Size 2 (5 $\frac{1}{16}$ " x 4 $\frac{1}{16}$ ", 11mm thick at heel)
- U Size 4 (6 $\frac{3}{8}$ " x 5 $\frac{3}{16}$ ", 12mm thick at heel)

EVA System Pads

Used to treat laminitis. Designed to minimise shock and reduce leveraging at point of breakover.

Available in:

- U Size 000: 4 $\frac{1}{4}$ "
- U Size 00: 4 $\frac{1}{2}$ "
- U Size 0: 4 $\frac{3}{4}$ "
- U Size 1: 5"
- U Size 2: 5 $\frac{1}{4}$ "

Castle Bar Wedge Pads

- U Graduated plastic wedge pads
- U Slide under the shoe during the shoeing process to get a degree increase at the heel
- U Available in sizes 2 and 4

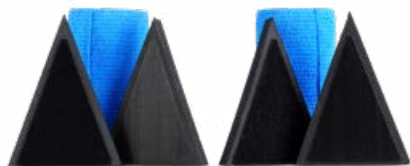

Styrofoam Support Pads

Pre-cut, hoof shaped pads made of a very dense Styrofoam. When applied, the Styrofoam compresses into the caudal portion of the foot and offers the horse comfort, support, and protection. Excellent for use with laminitic horses and ponies.

Available in:

- U Small: 5" x 5 $\frac{1}{2}$ ", 48mm thick
- U Medium: 5 $\frac{1}{4}$ " x 6", 48mm thick
- U Large: 5 $\frac{1}{2}$ " x 6 $\frac{1}{2}$ "
- U XL: 6" x 7"

Beanie Frog Aid Kit

A first aid treatment for acute laminitis, which can be used to apply support to the frog in the initial stages of foundering horses or ponies.

The unique velcro surface allows you to add or remove additional frog pads easily depending on how much pressure is required.

Contains enough for two feet and supplied with two vet-wrap bandages to make application of the pads quick and easy.

Beanie Frog Aid Medical Support System

A full-pad first aid treatment for laminitis, which is designed to be vet-wrapped on to the hoof for sore horses.

The separate velcro frog pads can be stuck on to the pad for extra frog-pressure with the intention of adding extra support, and as a result, some pain relief.

Includes 2 full soft pads and 2 soft frog velcro pads.

Kevin Bacon's

Kevin Bacon's Hoof Formula Supplement

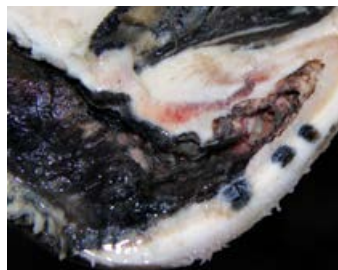

- U Arguably the best performing hoof supplement available in NZ

- U An ingenious tool to remove dirt from the threaded stud hole of the shoe
- U Quick and easy to use at a show or competition to clear the thread, making the job of putting studs in easier

EDUCATION

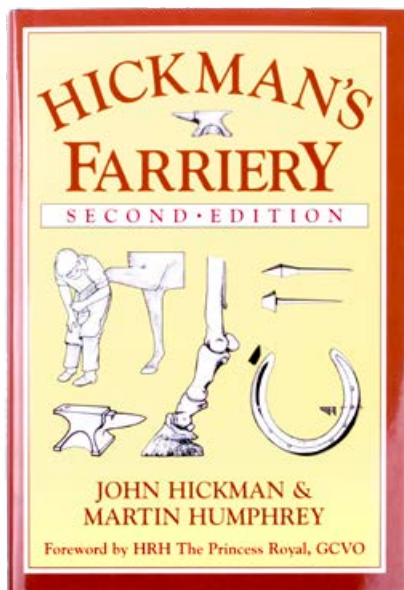

Books

American Farriers Journal

American Farriers Journal is the leading journal for farriers in the US and around the world.

Sold per issue. Back issues also available.

Hickman's Farriery 2nd Ed.

The new edition demonstrates how traditional skills can be combined with modern science to benefit the welfare, soundness and performance of the horse.

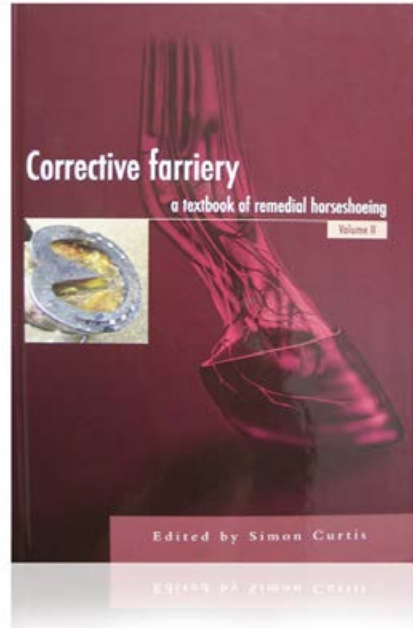

Explanations of the underlying structure of the horse's front and hind legs help farriers to better understand the scientific principles of their craft.

Corrective Farriery Volume I

Edited by Simon Curtis FWCF HonAssocRCVS

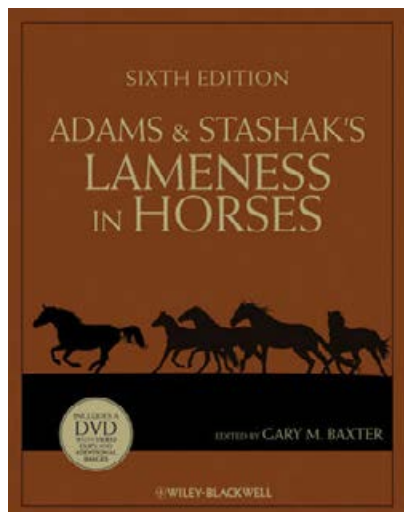

The book describes the combining of traditional farriery skills with veterinary knowledge and advanced techniques of repair and shoeing.

Corrective Farriery Volume II

Edited by Simon Curtis FWCF Hon AssocRCVS

Corrective Farriery Volume II completes a 2-part work covering all aspects of remedial shoeing and the associated background knowledge. Corrective Farriery starts with what is probably the most detailed anatomy of the equine hoof ever published.

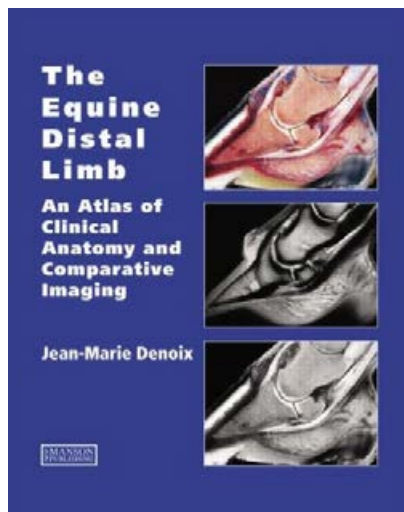

Adams Lameness in Horses

The Sixth Edition of Adams and Stashak's Lameness in Horses builds on the book's reputation as the classic gold-standard reference on equine lameness.

Now in full color, the text has been fully revised and streamlined to improve user-friendliness, with a new, simplified format and a stronger emphasis on the diagnosis and management of lameness. It includes a supplemental DVD.

Available by special order only.

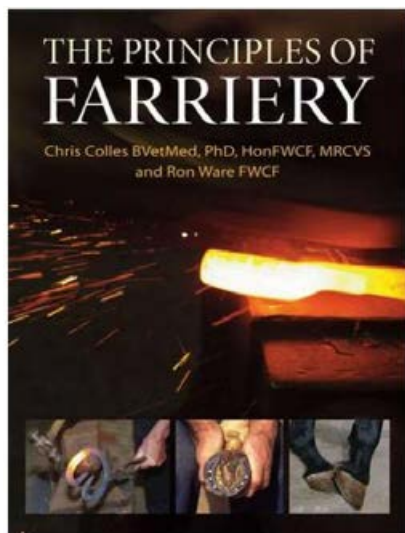

The Equine Distal Limb

By Jean Marie Denoix

This book provides a unique contribution and will be an invaluable reference text. The book is designed for maximum clarity using a generous page size. The atlas will be essential for anybody involved in detailed anatomical study, complex lameness evaluation or advanced imaging techniques.

Available by special order only.

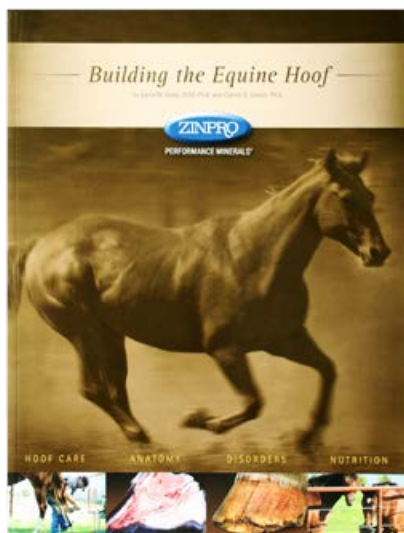

Principles of Farriery

By Chris Colles BVetMed, PhD, HonFWCF, MRCVS and Ron Ware FWCF

Essential reading for all trainee farriers and useful reference book for qualified farriers and vets.

Anatomy, shoe-making, modern farriery practice, foot and gait problems and remedial shoeing.

Includes over 400 illustrations with clear colour drawings and diagrams.

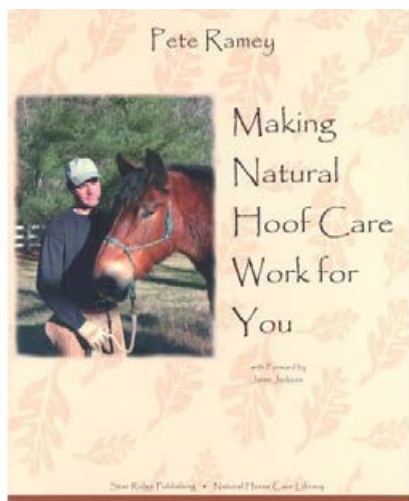

Building the Equine Hoof

By David M Hood, Connie K Swenson and A Bruce Johnson

An excellent 45 page resource with chapters on hoof care, anatomy, growth and nutrition, disorders and diseases.

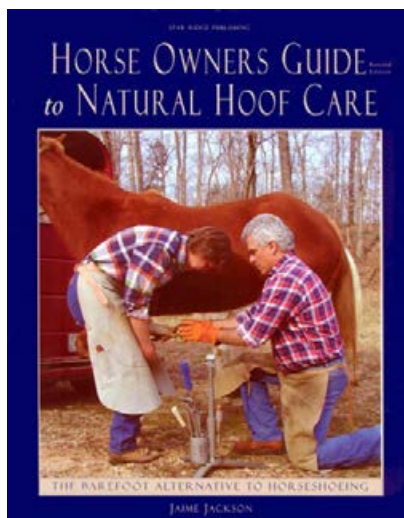

The standout feature of this book is a series of semi-transparent pages enabling the reader to see where and how the bones fit together inside the hoof.

Making Natural Hoof Care Work For You

By Pete Ramey

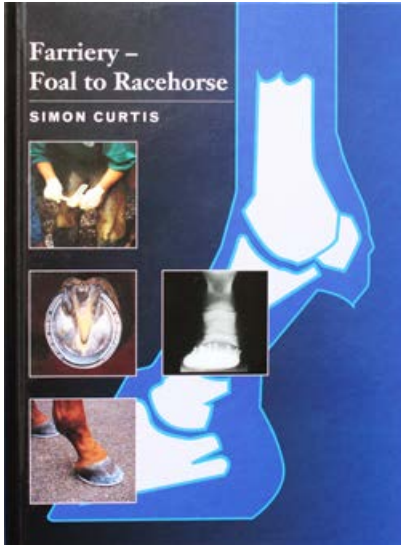

Making Natural Hoof Care Work for You is intended for horse owners, vets and of course, hoof care providers wanting "straight talk" and reliable information on how to "cross-over" into natural hoof care.

Horse Owners Guide to Natural Hoofcare

By Jaime Jackson

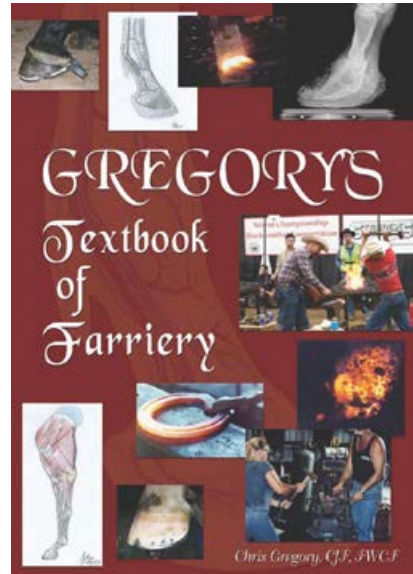

This book features step-by-step instructions for the natural trim based on the wild horse model. Written for horse owners who want to improve their understanding of natural hoof care, and also for farriers wanting to transition to natural hoof care.

Farriery - Foal to Racehorse

By Simon Curtis FWCF

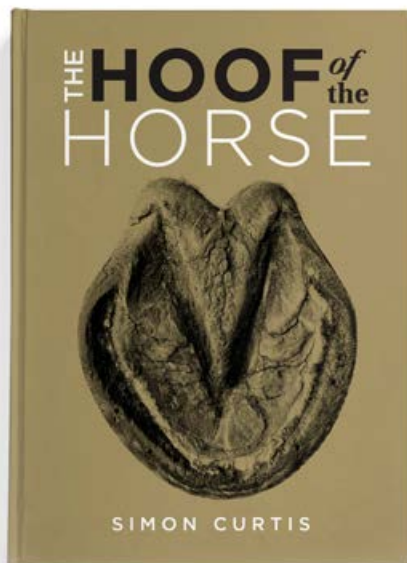

This book is for farriers, veterinary surgeons, trainers and breeders. It describes farriery involvement, from the newborn foal to the horse in training and back to the stud farm.

Gregory's Textbook of Farriery

By Chris Gregory, C.J.F, FWCF

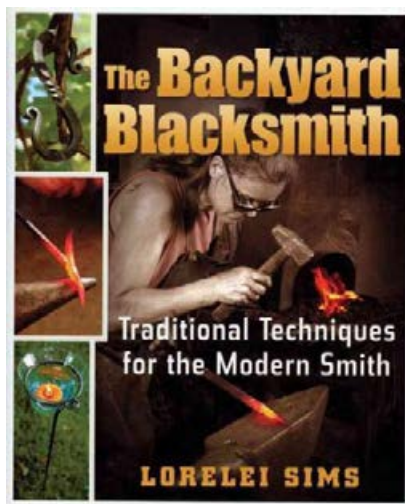

Gregory's Textbook of Farriery is a tremendous work on the craft and art of farriery. No one involved with horses should be without this great book.

The Hoof of the Horse

By Simon Curtis.

With over 250 colour illustrations, this latest book from Simon Curtis is filled with practical information and is on the must-read list for farriers, trimmers and anybody with an interest in the equine hoof.

The Backyard Blacksmith

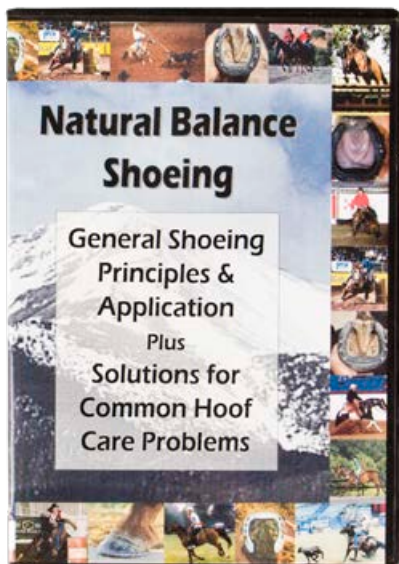

The Backyard Blacksmith: Traditional Techniques for the Modern Smith by Lorelei Sims

174 pages of how to make some simple tools and other useful items.

Full colour photos, instructions and illustrations.

The author, Lorelei Sims, is an experienced smith who runs Five Points Blacksmith Shop in Charleston, Illinois.

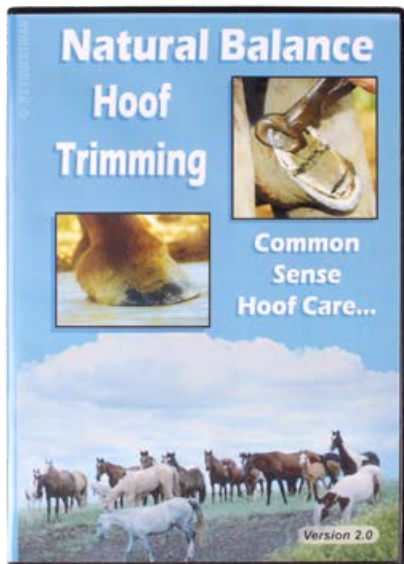

DVDs

Natural Balance Shoeing

By Gene Ovnicek

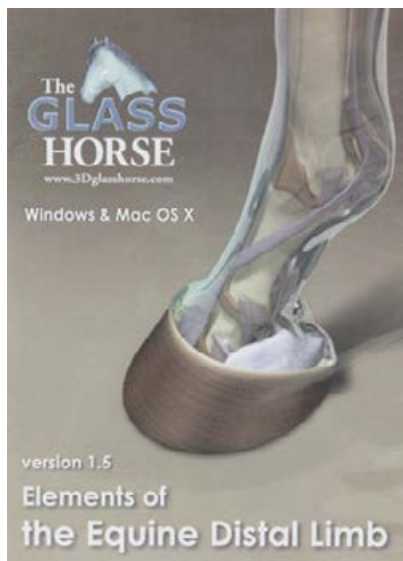

This DVD gives those interested in Natural Balance some comprehensive information regarding Natural Balance hoof preparation, application of Natural Balance Shoes, Pads and Impression Material. It also offers some instruction for horses with mismatched feet, underrun and contracted heels, as well as horses that are base narrow or pigeon toed.

Natural Balance Hoof Trimming

By Gene Ovnicek

This video will give you new insight and direction into the maintenance of the equine foot and the many factors that need to be considered when natural hoof trimming techniques are employed. It will also help you understand the needs of the equine hoof, as well as assist you in determining whether your horse can comfortably go without shoes in his domestic environment and perform at his expected level of use.

The Glass Horse

An engaging interactive exploration of the equine distal limb that combines interactive models with informative narrations and highly detailed animations. The interface allows manipulation of anatomical models in three dimensions.

Hoof Plastinates

Hoof SE20

This is a thin slice of an equine foot encased in a firm plastic casing making it ideal to have in the truck, classroom or at the stables without getting damaged

Hoof and Lower Limb Sheet SE30

- U Hoof and pastern plastinate
- U A handy piece for farriers, vets and owners

HORSE CARE

Kevin Bacon's

Kevin Bacon's Active Soap

- For treatment of itchy horses
- Repels external parasites
- 100% natural ingredients
- Applied with sponge (included)

Lucy Diamonds Horse Shampoo 1L

Contains plant extracts known for their softening and protective qualities as well as gentle washing bases of mint, eucalyptus and neem.

May be used in cases of itching due to insect bites or to protect the skin after sweating.

Particularly recommended for animals with sensitive skin that are exposed to inclement weather and for frequent washing.

Its unique formula protects against the bad odours that can be caused by micro-organisms.
